Five essential truths for every employee, every volunteer and everyone else who wants to become valuable to their organization. Elle Cooks is obsessed with the idea of falling in love with her Mr. Right. The problem is, everyone on campus knows it. Maybe it was the time she bought anniversary balloons for a guy she wasn't even dating. Or maybe it's her tendency to ask about marriage on the first date. Whatever the reason, most steer clear of this stage-five clinger. But Elle knows that her happily-ever-after is right around the corner. And luckily, she's about to be granted a helping hand from the most popular guy on campus. Steve Towers is different from Elle in every way. He's not only sworn off relationships for life, but the well-known ladies man has no trouble when it comes to the opposite sex. After witnessing Elle's latest rejection, he offers to teach her the ins and outs of dating, and how to finally play "the game" and win. But as the two turn Elle into an irresistible, eligible bachelorette, she may not be the only one with hearts in her eyes... Twenty-two genre-bending short stories of the strange and surreal from the Bram Stoker, World Fantasy, and International Horror Guild Award-winning author. Steve Rascic Tem is the celebrated author of award-winning horror novels and short story collections such as Blood Kin and City Fishing. But the stories featured in Celestial Inventories showcase his

ability to defy genre with imaginative works of the fantastic. These stories cross conventional boundaries between science fiction, fantasy, horror, literary fiction, bizarre, magic realism, and the new weird. Many of these stories have been lauded, appearing in Best of the Year compilations and receiving major Fantasy or Science Fiction nominations and awards. Others are collected from rare chapbooks, anthologies, and obscure magazines. And these previously published works are joined by a new story written specifically for this volume. When significant numbers of college-educated American women began, in the early twenty-first century, to leave paid work to become stay-at-home mothers, an emotionally charged national debate erupted. Karine Moe and Dianna Shandy, a professional economist and an anthropologist, respectively, decided to step back from the sometimes overheated rhetoric around the so-called mommy wars. They wondered what really inspired women to opt out, and they wanted to gauge the phenomenon's genuine repercussions. *Glass Ceilings and 100-Hour Couples* is the fruit of their investigation—a rigorous, accessible, and sympathetic reckoning with this hot-button issue in contemporary life. Drawing on hundreds of interviews from around the country, original survey research, and national labor force data, Moe and Shandy refocus the discussion of women who opt out from one where they are the object of scrutiny to one where their aspirations and struggles tell us about the far broader swath of American women who continue to juggle paid work and family. Moe and Shandy examine the many pressures that influence a woman's decision to resign, reduce, or reorient her career. These include the mismatch between child-care options and workplace demands, the fact that these women married men with demanding careers, the professionalization of stay-at-home motherhood, and broad failures in public policy. But Moe and Shandy are equally attentive to the resilience of women in the face of life decisions that might otherwise threaten their sense of self-worth. Moe and Shandy find, for instance, that women who have downsized their careers stress the value of social networks—of “running with a pack of smart women” who've also chosen to emphasize motherhood over paid work. USA Today best-selling author When the music stopped, it was murder Back in London's swinging '60s, Steve Cook was teen idol number one. But that changed when a sixteen-year-old fan was found dead in his hotel room bed. Steve's career came to a crashing halt after he was dumped by his record company and arrested. Now, in 1978 San Francisco, Steve works construction, still dreaming of a comeback. Until his eleven-year-old daughter is kidnapped. Steve turns to one person for help: Colleen Hayes. She was quite a fan herself, back in the day. And she knows what it's like to be on the wrong side of the law and live in judgement for the rest of your life. It doesn't take Colleen long to realize something fishy is going on with the kidnapping of Melanie Cook. What transpires is a harrowing journey through a music industry rife with corruption and crime. Colleen's search takes her through San Francisco's underbelly and all the way to '70s London, where she discovers a thread leading back to the death of a forgotten fan in Steve's hotel room. Perfect for fans of Harlan Coben's noir suspense This highly entertaining volume features dozens of immersive, trippy, funny, meditative, and mind-bending images ideal for stoned contemplation. Have you ever really looked at a book? The state of being high rewards deep attention, and lots of things can seem really, really interesting. It might be a spot on the ceiling, or an oddly-shaped tortilla chip, or a bit of wood grain. But why settle for staring at the coffee table? What if there was a book on that table specially created to amaze and delight pot smokers and their friends? Stoner Coffee Table Book is the ultimate conversation starter. Each page offers a new visual world of wonder that everyone can enjoy—especially those living the high life. Where is the space for dreaming in the twenty-first century? Lofty thoughts, like dreams, are born and live overhead, just as they have been represented in Renaissance paintings and modern cartoons. Ceilings are often repositories of stories, events and otherwise invisible oneiric narratives. Yet environments that inspire innovative thinking are dwindling as our world confronts enormous challenges, and almost all of our thinking, debating and decision-making takes place under endless ceiling grids. Quantitative research establishes that spaces with taller ceilings elicit broader, more creative thoughts. Today, ceilings are usually squat conduits of technology: they have become the blind spot of modern architecture. The twenty essays in this book look across cultures, places and ceilings over time to discover their potential to uplift the human spirit. Not just one building element among many, the ceiling is a key to unlock the architectural imagination. Ceilings and Dreams aims to correct this blind spot and encourages architects and designers, researchers and students, to look up through writings organized into three expansive categories: reveries, suspensions and inversions. The contributors contemplate the architecture of levity and the potential of the ceiling, once again, as a place for dreaming. From the author of *Our Noise*, an engaging and touching tale about the misadventures of a Virginia-based rock band Bottlecap that's “an intricate and richly detailed study in twentysomething generational manners and mores that's almost encyclopedic in scope” (Bret Easton Ellis). Bottlecap, the Virginia-based group introduced in Jeff Gomez's cult favorite *Our Noise*, traded in life as a small band on a struggling independent label for a lucrative contract with a big Los Angeles company. This should mean more money, more attention—more of all the stuff that comes with fame. But from the minute Mark, Steve, and Gary arrive in Los Angeles, they enter a world they don't quite understand. Mark, as leader of the band, tries to keep things under control, but his own life and his relationship with his new girlfriend Corinne—a native Angeleno and inveterate mallrat—begin to spin out of control. Steve falls under the influence of a neighbor with bad habits while Gary scours the city's thrift stores searching for Atari memorabilia and

a love of his own. Confusion reaches its peak when the record company's plans take an unexpected and, to the band, unacceptable turn. They must either completely sell out and surrender the band or take a stand, relegating themselves to commercial obscurity. Or is it already too late? With humor and insight, Gomez limns the lives of three young men who are geniuses at everything except what matters. Fans of *Our Noise* will welcome this update of *Bottlecap*; newcomers will find a writer with a rare talent for capturing the mood and the voice of a generation. The groundbreaking first-person account of successful recovery from dissociative identity disorder, now featuring a new preface by the author When Joan Frances Casey, a married twenty-six-year-old graduate student, "awoke" on the ledge of a building ready to jump, it wasn't the first time she couldn't explain her whereabouts. Soon after, Lynn Wilson, an experienced psychiatric social worker, diagnosed Joan with multiple personality disorder. She prescribed a radical program of reparenting therapy to individually treat her patient's twenty-four separate personalities. As Lynn came to know Joan's distinct selves—Josie, the self-destructive toddler; Rusty, the motherless boy; Renee, the people pleaser—she uncovered a pattern of emotional and physical abuse that had nearly consumed a remarkable young woman. Praise for *The Flock* "A testimony to [Casey's] courage and the dedication of her therapist, who believed that a profoundly fragmented self has the capacity to heal within a loving therapeutic relationship."—*The New York Times Book Review* "Absolutely mesmerizing . . . the first coherent autobiographical study of its kind."—*The Detroit News* "A compelling psychological odyssey offering unique insights into a nightmare world."—*Kirkus Reviews* "Extraordinary . . . deftly told and studded with striking images."—*Publishers Weekly*

But first impressions can be deceptive; Dave is a highly unusual tradesman with an odd line in biscuit-based philosophy, an open-minded approach to sex, and a cast-iron certificate in unblocking all sorts of pipes. A laugh-out-loud gay romantic comedy and treatise on class dynamics. Price controls across many sectors are currently being hotly debated. New controls in the housing market, more onerous minimum wages, minimum prices for alcohol, and freezes on energy prices are very high up the agenda of most politicians at the moment. Even without any further controls, wages, university fees, railway fares and many financial products already have their prices at least partly determined by politicians rather than by supply and demand in the market. Indeed, barely a sector of the UK economy is unaffected in one way or another by government controls on prices. This book demonstrates why economists do not like price controls and shows why they are widely regarded as being amongst the most damaging political interventions in markets. The authors analyse, in a very readable fashion, the damage they cause. Crucially, the authors also explain why, despite universal criticism from economists, price controls are so popular amongst politicians. Anxiety. Uncertainty. Mystery. Debauchery. Epiphany. Redemption. Loaded with chemicals, the baggage of a troubled past, and the crippling fear of an uncertain future, Andy Maxwell is lost, and going nowhere fast. College is supposed to be a wild ride - a time of exploration, and strategic self-abuse. But what happens when the ride is over, and you find yourself at a crossroads disguised as the end of the line? Being nothing is easy. Living up to the world's expectations, or even your own, is not. Scared to death by life itself, Andy does his best to outrun his demons - and to convince himself he's the one behind the wheel. But unseen forces, and the most unlikely angels, are driving him elsewhere. Saints and sinners alike serve as guides along the road to self-discovery, as Andy finds himself in the last place he would have ever expected. Staring at the Ceiling is a gritty, strangely-spiritual sojourn exploring the weight of responsibility, the pain of loss and growth, the cost of control, and ultimately the reward of letting go. Eight days in the heat of a small southern town can pass in a blur, can feel like an eternity, and can change a life forever. It appeared inevitable—Steven Brouschard was going to accomplish great things. He is intelligent, handsome, and equipped with the college degree he needs to obtain everything he ever wanted. It seemed nothing could hold him back. That is, almost nothing. Having already transcribed his lifelong dreams onto a tangible source to both motivate and remind, a series of eye-opening events transpire that reveal the unfortunate truth—his life had hit a brick wall. Haunted yet by a grave tragedy at the Palace of Westminster, he is torn between a mind-altering world of delusion and deceit where fact and fiction it seems—unbelievably coexist. Now, inhibited by his own perceptions more than anything, he is faced with the daunting tasks of overcoming his worst fears and conquering his greatest enemy of all. If not resolved soon, his incapacitating dissension from truth will entirely eclipse the shocking truth itself. While converting a former mortuary into a B & B, Jennifer Nailor discovers that evil still lives within these walls when her brother, Steve, under the influence of the spirit of Eleanor Grimm, the mortuary's former owner who was a powerful witch, prepares to place Eleanor's soul into Jennifer's unborn child.

Steven Lee always thought that having superpowers would make him happy, make life easier, and make everything more fun. He was wrong. Steven, now 16 years old, has spent years living with the power of the Tiger. But now, on the edge of a catastrophe that could destroy not only Steven and his super powered friends, but every Zodiac in the world, Steven will have to decide just how far he'll go to protect those closest to him. Stan Lee, Stuart Moore, and Andie Tong bring the earth-shaking conclusion to *The Zodiac Legacy!* The first book to explore the life and extraordinary work of the legendary moviemaker who directed *Singin' in the Rain*, *On the Town*, and *Funny Face*, from the author of *David Lean* ("Silverman has captured one of the world's truly great filmmakers"—Billy Wilder). Stanley Donen is the man who forever changed the Hollywood musical, moving it away from the Busby Berkeley extravagance to a felt integration of the songs and dances. He is also the man who helped shape the sophisticated romance exemplified by *Indiscreet* and *Charade*. The author, with Donen's cooperation, has brilliantly revealed Donen's fifty-year career—first in the theater, next in Hollywood, and then abroad. We see Donen's collaborations with Fred Astaire, Cary Grant, Gene Kelly, and Frank Sinatra. And we see his work with Rodgers and Hart, Alan Lerner, Comden and Green, Roger Edens, Arthur Freed, Michael Kidd, and Bob Fosse. We watch Donen growing up in the South in the 1930s, seeking refuge at movies, watching Fred Astaire dance on the screen, and forever changed by it. And then at sixteen, fleeing to New York, where he lands his first job in the chorus of the groundbreaking musical *Pal Joey*, directed by George Abbott, starring Gene Kelly...and appearing next in *Best Foot Forward*. We follow Donen west to MGM (first he was a chorus boy, then assistant choreographer)...next embellishing *Anchors Aweigh*, dreaming up the almost technically impossible notion of having its star, Gene Kelly, dance with a cartoon character, *Jerry the Mouse*...and in the next decade making one great musical after another. We hear Donen's recollections of life and work on the sets of *Singin' in the Rain*, *Royal Wedding*, *Funny Face*, *Seven Brides for Seven Brothers*, *On the Town*, *The Pajama Game*, *Indiscreet*, *Charade*, *Two for the Road*, *Arabesque*, *Bedazzled*, and other movies he directed. We see him through the eyes of more than one hundred of his contemporaries whom, in addition to Donen himself, Silverman has interviewed at length, from Kay Thompson and Billy Wilder to Deborah Kerr, Audrey Hepburn, Debbie Reynolds, Gregory Peck, and Cyd Charisse. Dancing on the Ceiling gives, close up, a great director and a lost Hollywood on whose silver screen wit and charm abounded. Over 40 tales of monsters, magic, mystery, and madness. From the real to the weird, from the traumatic to the hilarious. Includes three shortlisted works. So, make yourself a cup of coffee or a pot of tea. Turn off the lights. Make sure you locked your front door. (Did you remember to latch it? Best check.) Wrap your hands around your mug. Wrap your blanket around your shoulders. Come, spend a while in the twisted corners of the human mind. And always keep an eye on the shifting shadows. Sometimes, terrible things lurk in the darkness. Steve and Melanie Tem have expanded the ideas in the original award-winning story *The Man on the Ceiling* to create a compelling work that examines how people find a family, stay together despite incomprehensible tragedy, and, in the end, how they find love. Love Inspired Suspense brings you three new titles! Enjoy these suspenseful romances of danger and faith. Angie McCaffrey has endured her share of liquid lunches and boardroom shmoozefests to win new advertising clients. But her latest account—a cosmetics line for wannabe vampires—involves some unusual customer research at San Francisco's hippest private nightclub. The "undead" patrons are about as genuine as Macabre Factor's press-on fangs, but one thing is very real—the skin-tingling connection Angie feels with her clients' mysterious friend, Eric Taylor. Still, there are a few problems with this hot new romance. 1) Eric is rumored to have dated Angie's scheming boss, Lucy. 2) Lucy, missing for days, just turned up dead and bloodless. And, oh yeah, 3) Angie has suddenly developed a teeny aversion to sunlight. Is Eric a real vampire, a killer, or both? Angie's got a lot riding on the answer—her heart, her life, and maybe even her soul. . .

"Clare Willis offers a clever twist on the world of vampires." —Alexandra Ivy, author of *Darkness Unleashed* There are many situations where it is useful to estimate the probability that some weather event will occur on some specified future date. A way of making the estimate is to calculate the proportion of time that the event occurred in previous years. There exist large environmental data bases that can be used to make such estimates. Because these data bases are so large, summaries are usually used. USAFETAC, Air Weather Service, regularly produces, for a large number of stations, a 'Revised Uniform Summary of Surface Weather Observations'. These 'RUSSWO's' provide a very convenient summary and are widely used. This report makes use of the Burr Curve with three parameters to effectively compact data on ceiling for a number of locations. The Burr Curve, which has a closed form cumulative distribution function, is used to model ceiling. Ceiling is modeled for 23 stations distributed throughout the world. Separate models are given for each station for each month and for each three-hour period of the day. Estimates of the error in using the model to estimate ceiling probabilities are given.
