I needed a walker around the house. I couldn't bend. I could barely move. Short of my eighties, I now "knew" what it was like being near the end, near dying. When you are old, the idea of dying is a frequent visitor. I was wrong. Whatever was wrong with me is today also wrong with much younger people. The modern world does not do us favors in some ways, I have learned--and it is human ingenuity at fault. I am writing about that too, among other things. On occasion nearly everyone experiences short-term back pain from sore or strained muscles. But for many who come to treat their back gingerly because they fear further "injury," a cycle of worry and inactivity results; this aggravates existing muscle tightness and leads them to think of themselves as having a "bad back." Even worse is the understandable but usually counterproductive assumption that back pain is caused by "abnormalities"-bulging disks, a damaged spine, and so on. However, these abnormalities are frequently found in those who have absolutely no pain whatsoever. In reality, most backs are strong and resilient, built to support our bodies for a lifetime; truly "bad backs" are rare. Drawing on their work with patients and studies from major scientific journals and corporations, the authors of Back Sense—all three are former chronic back pain sufferers themselves—developed a revolutionary self-treatment approach targeting the true causes of chronic back pain. It is based on conclusive evidence proving that stress and inactivity are usually the prime offenders, and it allows patients to avoid the restrictions and expense of most other treatments. After showing readers how to rule out the possibility that a rare medical condition is the source of their problem, Back Sense clearly and convincingly explains the actual factors behind chronic back pain and systematically leads readers toward recapturing a life free of back pain.

Where Did My Country Go and Taking My Country Back A clandestine war has been raging against American ideals and Christian beliefs/morality for well over a century, surfacing in the last few decades to reveal the sinister face of the enemy. The enemy's war machinery is being run by those who call themselves "Progressives." In truth, there is nothing at all progressive about them; their name masks the eons old belief system of secular humanism and their collectivist mission to steal liberty. This enemy's mortar fire has been targeting our American heritage, chiseling away at the foundation of Christian beliefs, morality, ethics, and free enterprise which our Founding Fathers put in place as underpinnings of the American dream. One tragedy from these savage attacks is a remanufactured, politically correct, phony, and deceptive history that has been rewritten about who Americans are, the individualism that has made our nation great, making us the envy of the world. Our author Dean Chrisco is convinced there is a way to solve our many problems as our nation sits at this fork in the road. He contends that collectively, most Americans have a form of national amnesia; they do not even know who they are anymore or what trademarks made our nation such a special place in years past. To discover the solution, he contends the first issue at hand is to observe the genuine historical past of our nation, including the Founder's implementations that set our country on the right course. Knowing our true past is the facilitator that brings us face to face with our true identify, our heritage, and the problems caused by attacks made along the way. History reveals the true foundation and underpinnings of how our nation, something the Leftists do not want young citizens to see. Said differently, history becomes a lens through which we can view the hidden and internal workings of our nation's past, seeing infectious problems, much like a CT-Scan does in the world of medicine when considering treatment for a problem with the human body.
