Remote Delivery Jul 06 2021 This book records the author's years of experience in the software industry. In his own practices, the author has found that the distributed work pattern has become increasingly popular in more and more work environments, either between vendors and customers or between different teams

inside a company. This means that all practitioners in the software industry need to adapt to this new way of communication and collaboration and get skilled enough to meet the greater challenges in integrating the distributed work pattern with agile software delivery. By centering on the difficulties in communication and collaboration between distributed teams, this book digs into the reasons why so many remote delivery projects end up anticlimactic and provides solutions for readers' reference. It also cites successful cases in promoting agile development in distributed teams, which has been a vexing problem for many software development companies. In addition, readers can find suggestions and measures for building self-managing teams in this book. *Remote Delivery: A Guide to Software Delivery through Collaboration between Distributed Teams* is a very practical guide for software delivery teams with their members distributed in different places and companies engaged in software customization. Developers, QAs, product managers, and project leaders can also be inspired by this book.

Research on Hydropower Development and Delivery in Congo River Dec 23 2022 This book systematically discusses hydropower development on the Congo River. Accelerating the development of hydropower on the Congo will significantly enhance the interconnection of Africa's cross-border, trans-regional and intercontinental power grids, ensure a clean, reliable and affordable electricity supply in Africa, and promote the electrification, industrialization, and integration of Africa. The book comprehensively assesses the hydropower resources and watershed characteristics of the Congo River, focuses on cascade hydropower development planning and design in the lower reaches of the Congo River, and analyzes the hydropower consumption market, transmission scheme, construction timing, investments and economy. Project investments, financing mechanisms and safeguard measures are also addressed. The plan presented here offers a vital resource for all those interested in hydropower development in the Congo River and sustainable development in Africa.

Automating Instructional Design: Computer-Based Development and Delivery Tools Oct 21 2022 This institute was organized and presented by an international group of scholars interested in the advancement of instructional design automation through theory, research and applied evaluation. Members of the organizing committee included Dr. Klaus Breuer from disce (Germany), Dr. Jose J. Gonzalez from Agder College of Engineering (Norway), Dr. Begofia Gros from the University of Barcelona, Dr. J. Michael Spector from the Armstrong

Laboratory (USA). Dr. Gonzalez, co-director of the institute, and the staff of Agder College were directly responsible for the preparation and operation of the institute in Grimstad, Norway. The institute was held on the campus of Agder College of Engineering, July 12-23, 1993. The theme of the institute extended the initial work developed by the presenters at a NATO Advanced Research Workshop held in Sitges, Spain in 1992. During the two week institute, 21 presentations were made including papers and demonstrations. In addition to the formal presentations, working groups and on-site study groups provided opportunities for the students to participate directly in program activities. An important outcome for the working groups was the formal preparation of their efforts in chapters for this volume.

Gene Delivery Systems Sep 08 2021 Gene therapy is a technique that modifies a person's genes to treat or cure disease and can be used as an alternative to

using drugs or surgery. Here the authors discuss the development of gene therapy today, from the technology involved to gene correction and the advances in genome editing. Several new drug delivery systems are explored for the applications of gene therapy. These are found to be useful in treating chronic illnesses, including cancer and infectious diseases. Key Features: Overview of the development of gene therapy Provides the most up to date information on the development of gene therapy, from the technology involved to gene correction and genome editing Presents CRISPR gene therapy recent trends and applications Discusses siRNA, mRNA, and DNA plasmids A collection of 15 chapters containing recent research, this volume covers the development of gene therapy, the technology involved, clinical applications of siRNA, non-viral vector-based mRNA delivery using nanotechnology, and RNA based vaccines for treating the infectious diseases. It also presents the current application of CRISPR/Cas9 gene-editing technique, an approach that has recently been given the Nobel Prize in Chemistry, 2020.

Enterprise Software Delivery May 16 2022 Globalization, rapid technology churn, and massive economic shifts have made it more difficult than ever to deliver high-value enterprise software. In *Enterprise Software Delivery*, IBM Distinguished Engineer Alan W. Brown guides decision-makers in understanding these new challenges, choosing today's best solutions, and successfully anticipating future trends. Alan presents detailed, actionable techniques for building software supply chains that improve agility and innovation while responding to growing cost pressure. Using real-world case studies, he introduces the modern global software factory, demonstrating how to integrate and leverage global outsourced teams, collaborative application lifecycle management, and cloud-based virtual infrastructures. Drawing on his extensive experience leading IBM Rational software strategy, and consulting with IBM enterprise customers, Alan illuminates everything from software R&D to metrics. Coverage includes Understanding recent dramatic changes in enterprise software delivery requirements and practices Overcoming false assumptions, outdated data and delivery models, and inexperience with strategy, innovation, education, or research Incorporating integrators and partners in centers of excellence that specialize in delivering business value Establishing team-based practices that encourage agility, scalability, and quality Building adaptive software factories that integrate real-time feedback and respond rapidly to change Using virtualized collaborative infrastructure to connect worldwide teams for developing software, assembling solutions, and delivering results Transcending barriers related to geography, organization, skills, and culture If you're an enterprise software leader, strategist, or practitioner, this book can help you improve every facet of performance you care about, including agility, quality, predictability, innovation, and value.

Drug Delivery and Development of Anti-HIV Microbicides Nov 10 2021 The worldwide impact of HIV/AIDS is well recognized. This book provides for the first time a thorough and critical overview of current aspects, recent developments,

and trends in the formulation and drug delivery concerning anti-HIV microbicides by leading scientists in the field. Additionally, pertinent regulatory aspects and socioeconomical issues related to the subject are discussed. In the absence of a cure, prophylaxis represents a cornerstone in the battle against infection. One promising strategy comprises the use around the time of sexual intercourse of vaginal/rectal products containing antiviral compounds, termed microbicides. It is now recognized that specific development of drug dosage forms and/or drug delivery systems is an indispensable aspect for the success of microbicides. Different groups strived over the last decade to optimize the biophysical and technological performance of traditional dosage forms (gels, tablets, and suppositories) to fulfill the specificities of microbicides use, without neglecting users' preferences and affordability issues. Moreover, new formulation approaches, such as vaginal rings and films, nanotechnology-based systems, stimuli-sensitive formulations, targeted drug delivery systems, among others have been proposed and are currently undergoing pre-clinical or even clinical testing.

Automating Instructional Design, Development, and Delivery Jan 24 2023 This workshop was organized and presented by an international group of scholars interested in the advancement of automating instructional design. Although the principal leader for this effort was myself, each of the committee members devoted equally in time and effort in the total preparation and conducting of the workshop. Members of the organizing committee included Dr. Klaus Breuer from disce and the University of Paderborn (Germany), Dr. Begofia Gros from the University of Barcelona, and Dr. Daniel Muraida and Dr. Michael Spector from the Armstrong Laboratory (USA). Dr. Gros participated as the co-director of the workshop and was directly responsible for the preparation and operation of the workshop in Sitges, Spain. The workshop was held in Sitges, a short distance from Barcelona, March 23-27, 1992. Because of preparations at that time for the 1992 summer Olympic Games in Barcelona, the workshop was moved to a more convenient location. The theme of the workshop included three main topics: planning, production, and implementation. Dr. Peter Goodyear, from the Lancaster University (England), presented the invited keynote address. During the four day workshop, 14 papers were presented and discussed. Following each of the three topic areas, Drs. Gros and Breuer led discussions critiquing the ideas presented.

Parallel Agile – faster delivery, fewer defects, lower cost Feb 19 2020 From the beginning of software time, people have wondered why it isn't possible to accelerate software projects by simply adding staff. This is sometimes known as the "nine women can't make a baby in one month" problem. The most famous treatise declaring this to be impossible is Fred Brooks' 1975 book *The Mythical Man-Month*, in which he declares that "adding more programmers to a late software project makes it later," and indeed this has proven largely true over the decades. Aided by a domain-driven code generator that quickly creates database and API code, Parallel Agile (PA) achieves significant schedule compression using parallelism: as many developers as necessary can independently and concurrently develop the scenarios from initial prototype through production code. Projects can scale by elastic staffing, rather than by stretching schedules for larger development efforts. Schedule compression with a large team of developers working in parallel is analogous to hardware acceleration of compute problems using parallel CPUs. PA has some similarities with and differences from other Agile approaches. Like most Agile methods, PA "gets to code early" and uses feedback from executable software to drive requirements and design. PA uses technical prototyping as a risk-mitigation strategy, to help sanity-check requirements for feasibility, and to evaluate different technical architectures and technologies. Unlike many Agile methods, PA does not support "design by refactoring," and it doesn't drive designs from unit tests. Instead, PA uses a minimalist UML-based design approach (Agile/ICONIX) that starts out with a domain model to facilitate communication across the development team, and partitions the system along use case boundaries, which enables parallel development. Parallel Agile is fully compatible with the Incremental Commitment Spiral Model (ICSM), which involves concurrent effort of a systems engineering team, a development team, and a test team working alongside the developers. The authors have been researching and refining the PA process for several years on multiple test projects that have involved over 200 developers. The book's example project details the design of one of these test projects, a crowdsourced traffic safety system.

The Development Dance Apr 03 2021 In a book full of directly applicable lessons for policymakers, Haley J. Swedlund explores why foreign aid is delivered in different ways at different times, and why various approaches prove to be politically unsustainable. She finds that no aid-delivery mechanism has yet resolved commitment problems in the donor-recipient relationship; bargaining compromises break down and have to be renegotiated; frustration grows; new ways of delivering aid gain traction over existing practices; and the dance resumes. Swedlund draws on hundreds of interviews with key decision makers representing both donor agencies and recipient governments, policy and archival documents in Ghana, Rwanda, Tanzania, and Uganda, and an original survey of top-level donor officials working across twenty countries in Sub-Saharan Africa. This wealth of data informs Swedlund's analysis of fads and fashions in the delivery of foreign aid and the interaction between effectiveness and aid delivery. The central message of *The Development Dance* is that if we want to know whether an aid delivery mechanism is likely to be sustained over the long term, we need to look at whether it induces credible commitments from both donor agencies and recipient governments over the long term.

Delivering New Homes Aug 07 2021 This book examines the processes and relationships that underpin the delivery of new homes across the United Kingdom, focussing primarily on the land use planning system in England, the way that housing providers engage with that system, and how the processes of engagement are changing or might change in the future. Planning, market and social house building - the three key processes - are first dissected and explored individually, then brought together to study the key areas of interaction between planning and the providers of social and market housing by way of the range of tensions that have consistently dogged those interactions. Extensive illustrative case study material provides a platform to the consideration of developing more integrated, realistic and proactive approaches to planning. Proposing evolutionary, and sometimes radical proposals for change, *Delivering New Homes* makes a bold contribution to finding a better way of delivering the new homes that the nation increasingly needs.

Technology-Based Training Mar 14 2022 In response to budgetary constraints, satellite offices, and advances in computers and software, training and education is evolving. For all organizations, technology-based training has become a viable option to traditional instructor-led training. This book allows professionals to survey the available options and make reasoned decisions about when technology-based training is or is not useful. The CD-ROM is packed with useful tools, ask-the-author sessions, and links to Web-based resources.

Standardization in the Development and Delivery Methods of Technology Workshops Mar 02 2021 Trainers have long relied on visual content to make their training more effective. As the use of computer-based delivery has become an accepted method of distributing training and instructional materials, a system of standardizing the development and delivery of training workshops was worthy of considerable attention. The study concludes that while many of the older studies do not directly address the use of computer-based presentation applications, a development process can be achieved to streamline the creation of instructional content while maintaining consistency and quality in the content created.

Disciplined Agile Delivery Feb 13 2022 Master IBM's Breakthrough DAD Process Framework for Succeeding with Agile in Large, Complex, Mission-Critical IT Projects It is widely recognized that moving from traditional to agile approaches to build software solutions is a critical source of competitive advantage. Mainstream agile approaches that are indeed suitable for small projects require significant tailoring for larger, complex enterprise projects. In Disciplined Agile Delivery, Scott W. Ambler and Mark Lines introduce IBM's breakthrough Disciplined Agile Delivery (DAD) process framework, which describes how to do this tailoring. DAD applies a more disciplined approach to agile development by acknowledging and dealing with the realities and complexities of a portfolio of interdependent program initiatives. Ambler and Lines show how to extend Scrum with supplementary agile and lean strategies from Agile Modeling (AM), Extreme Programming (XP), Kanban, Unified Process (UP), and other proven methods to provide a hybrid approach that is adaptable to your organization's unique needs. They candidly describe what practices work best, why they work, what the trade-offs are, and when to consider alternatives, all within the context of your situation. Disciplined Agile Delivery addresses agile

practices across the entire lifecycle, from requirements, architecture, and development to delivery and governance. The authors show how these best-practice techniques fit together in an end-to-end process for successfully delivering large, complex systems--from project initiation through delivery. Coverage includes Scaling agile for mission-critical enterprise endeavors Avoiding mistakes that drive poorly run agile projects to chaos Effectively initiating an agile project Transitioning as an individual to agile Incrementally building consumable solutions Deploying agile solutions into complex production environments Leveraging DevOps, architecture, and other enterprise disciplines Adapting your governance strategy for agile projects Based on facts, research, and extensive experience, this book will be an indispensable resource for every enterprise software leader and practitioner--whether they're seeking to optimize their existing agile/Scrum process or improve the agility of an iterative process.

Effective Interprofessional Education Jun 05 2021 This volume presents a practical guide to the development, application and evaluation of effective interprofessional education in health and social care. It is both a practice manual for those in hands-on roles and a reflective guide for those indirectly involved in professional education. The book provides clear advice on methods of establishing training and education programmes and evaluating their effectiveness, while simultaneously examining the relationship between initial application, ongoing maintenance and subsequent assessment. The authors expound multiple points of view that will generate individual thinking and approaches to both the practice and the estimation of interprofessional education schemes. The book is divided into three sections: the first introduces the differing approaches to professional education and the rationale behind measuring their worth; the second part focuses on planning, development and delivery; the third part advises in a robust and pragmatic way on modes of measuring the efficacy of programmes. The interrelation of these topics is then examined to provide a synthesised perspective on the development, delivery and evaluation of interprofessional education.
