It first presents a theoretical model where the size of informal employment is determined by the relative costs and benefits of informality and the distribution of workers' skills. In the long run, informal employment varies with the trends in these variables, and in the short run it reacts to accommodate transient shocks and to close the gap that separates it from its trend level. The paper then uses an error-correction framework to examine empirically informality's long- and short-run relationships. For this purpose, it uses country-level data at annual frequency for a sample of industrial and developing countries, with the share of self-employment in the labor force as the proxy for informal employment. The paper finds that, in the long run, informality is larger in countries that have lower GDP per capita and impose more costs to formal firms in the form of more rigid business regulations, less valuable police and judicial services, and weaker monitoring of informality. In the short run, informal employment is found to be counter-cyclical for the majority of countries, with the degree of counter-cyclicity being lower in countries with larger informal employment and better police and judicial services. Moreover, informal employment follows a stable, trend-reverting process. These results are robust to changes in the sample and

to the influence of outliers, even when only developing countries are considered in the analysis.  
*The Financial Diaries* Jul 19 2022 What the financial diaries of working-class families reveal about economic stresses, why they happen, and what policies might reduce them Deep within the American Dream lies the belief that hard work and steady saving will ensure a comfortable retirement and a better life for one's children. But in a nation experiencing unprecedented prosperity, even for many families who seem to be doing everything right, this ideal is still out of reach. In *The Financial Diaries*, Jonathan Morduch and Rachel Schneider draw on the groundbreaking U.S. *Financial Diaries*, which follow the lives of 235 low- and middle-income families as they navigate through a year. Through the *Diaries*, Morduch and Schneider challenge popular assumptions about how Americans earn, spend, borrow, and save—and they identify the true causes of distress and inequality for many working Americans. We meet real people, ranging from a casino dealer to a street vendor to a tax preparer, who open up their lives and illustrate a world of financial uncertainty in which even limited financial success requires imaginative—and often costly—coping strategies. Morduch and Schneider detail what families are doing to help themselves and describe new policies and technologies that will improve stability for those who need it most. Combining hard facts with personal stories, *The Financial Diaries* presents an unparalleled inside look at the economic stresses of today's families and offers powerful, fresh ideas for solving them.

**Politics, Work, and Daily Life in the USSR** Jan 21 2020 Politics, work, and daily life in the USSR is designed to illustrate how the Soviet social system really works and how the Soviet people cope with it. This study is based on the first comprehensive survey of life in the USSR since the Harvard Project over thirty-three years ago. The essays contained analyze the variations in attitude and behaviour reflected in the findings of the Soviet Interview Project, a five-year investigation of contemporary daily life in the USSR. The survey involved interviewing thousands of recent emigrants from the USSR to the United States as a means of learning about their former day-to-day lives. Some aspects of this survey dealt with areas the Soviets themselves had never investigated, so the data were not, and indeed still are not,

available even in unpublished Soviet sources. This study of a large volume of firsthand observations is extremely valuable to anyone interested in the inner workings and behavioural dynamics of the contemporary Soviet social system.
