Now completely revised (over 90% new), this is the authoritative diagnostic manual grounded in psychodynamic clinical models and theories. Explicitly oriented toward case formulation and treatment planning, PDM-2 offers practitioners an empirically based, clinically useful alternative or supplement to DSM and ICD categorical diagnoses. Leading international authorities systematically address personality functioning and psychological problems of infancy, childhood, adolescence, adulthood, and old age, including clear conceptualizations and illustrative case examples. Purchasers get access to a companion website where they can find additional case illustrations and download and print five reproducible PDM-derived rating scales in a convenient 8 1/2" x 11" size. New to This Edition \*Significant revisions to all chapters, reflecting a decade of clinical, empirical, and methodological advances. \*Chapter with extended case illustrations, including complete PDM profiles. \*Separate section on older adults (the first classification system with a geriatric section). \*Extensive treatment of psychotic conditions and the psychotic level of personality organization. \*Greater attention to issues of culture and diversity, and to both the clinician's and patient's subjectivity. \*Chapter on recommended assessment instruments, plus reproducible/downloadable diagnostic tools. \*In-depth comparisons to DSM-5 and ICD-10-CM throughout. Attachment theory is among the most popular theories of human socioemotional development, with a global research community and widespread interest from clinicians, child welfare professionals, educationalists and parents. It has been considered "one of the most generative contemporary ideas" about family life in modern society. It is one of the last of the grand theories of human development that still retains an active research tradition. Attachment theory and research speak to fundamental questions about human emotions, relationships and development. They do so in terms that feel experience-near, with a remarkable combination of intuitive ideas and counter-intuitive assessments and conclusions. Over time, attachment theory seems to have become more, rather than less, appealing and popular, in part perhaps due to alignment with current concern with the lifetime implications of early brain development. Cornerstones of Attachment Research re-examines the work of key laboratories that have contributed to the study of attachment. In doing so, the book traces the development in a single scientific paradigm through parallel but separate lines of inquiry. Chapters address the work of Bowlby, Ainsworth, Main and Hesse, Sroufe and Egeland, and Shaver and Mikulincer. Cornerstones of Attachment Research utilises attention to these five research groups as a lens on wider themes and challenges faced by attachment research over the decades. The chapters draw on a complete analysis of published scholarly and popular works by each research group, as well as much unpublished material. This volume is a presentation of all methods of legal knowledge representation from the point of view of jurisprudence as well as computer science. A new method of automatic analysis of legal texts is presented in four case studies. Law is seen as an information system with legally formalised information processes. The achieved coverage of legal knowledge in information retrieval systems has to be followed by the next step: conceptual indexing and automatic analysis of texts. Existing approaches of automatic knowledge representations do not have a proper link to the legal language in information systems. The concept-based model for semi-automatic analysis of legal texts provides this necessary connection. The knowledge base of descriptors, context-sensitive rules and meta-rules formalises properly all important passages in the text corpora for automatic analysis. Statistics and self-organising maps give assistance in knowledge acquisition. The result of the analysis is organised with automatically generated hypertext links. Four case studies show the huge potential but also some drawbacks of this approach. Digest of Supreme Court judgments from 1950-2000. There has been a long-standing debate on the compatibility of EU competition law with fundamental rights protection, particularly as the latter is enshrined in the due process requirements of the European Convention on Human Rights (ECHR). This book, a signal contribution to that debate, assesses two questions of paramount concern: first, whether the current level of fundamental rights protection in cartel enforcement falls within the accepted ECHR standards; and second, how the often conflicting objectives of effectiveness and adequate protection of fundamental rights could optimally be achieved. Following a detailed survey of relevant EU institutional, substantive, and procedural law rules, the author offers a set of persuasive normative responses to both questions. Proceeding from an in-depth analysis of the pertinent rights and legal nature of competition proceedings under EU and ECHR law, the author goes on to examine such elements of the perceived incompatibility as the following: investigatory powers vested in competition authorities; the privilege against self-incrimination; right to privacy; "fair trial" probatory requirements; degree of use of presumptions in EU practice; Article 6 ECHR guarantees pertaining to the presumption of innocence; proving coordination of competitive behaviour; proving restriction of competition; admissibility of evidence before EU Courts and the Commission; assessment of the attribution of liability rules; EU fining rules; judicial review of cartel decisions by EU Courts; and national sanctioning rules. The author's extraordinarily thorough presentation is rounded off with a remarkably comprehensive bibliography that lists (in addition to books and articles) newspaper articles, EU regulations and directives, soft-law guidelines and "best practices", EU and ECtHR case law, EU Advocate General opinions, European Commission decisions, and European Ombudsman decisions. General conclusions stress the necessity of introducing further reforms to enhance the effectiveness and legitimacy of fundamental rights in the context of competition proceedings. Few books have taken such a thorough and far-reaching approach to the reconciliation of "effective public enforcement" and "fundamental rights", or of "effective deterrence" with the principles of legality, non-retroactivity, presumption of innocence, and ne bis in idem. In the depth of its appraisal of the entire spectrum of enforcement components from a fundamental rights perspective, the book is without peers. It will be warmly welcomed by any parties interested in the intersection of competition law and human rights. Sections 1-2. Keyword Index.--Section 3. Personal author index.--Section 4. Edited by Professor Takenaka, director of the University of Washington's renowned Center for Advanced Studies and Research on IP (CASRIP), the book assembles deep but easy to read essays by some of the world's leading IP scholars. In short, IP Law's most important issues from a global perspective; by the world's leading scholars, yet in a nutshell. Excellent! **Christoph Ann, Technische Universität München, Germany** Despite increasing worldwide harmonization of intellectual property, driven by US patent reform and numerous EU Directives, the common law and civil law traditions still exert powerful and divergent influences on certain features of national IP systems. Drawing together the views and experiences of scholars and lawyers from the United States, Europe and Asia, this book examines how different characteristics embedded in national IP systems stem from differences in the fundamental legal principles of the two traditions. It questions whether these elements are destined to remain diverged, and tries to identify common ground that might facilitate a form of harmonization. Containing the most current and up-to-date IP issues from a global perspective, this book will be a valuable resource for IP and comparative law academics, law students, policy makers, as well as lawyers and in-house counsels. Offering a concise and critical comparison of EU competition law and US antitrust law from an economic perspective, this is the ideal textbook for international and interdisciplinary courses combining law and economic approaches. **Introductory Psychology** is a major text ideal for those embarking on the study of psychology for the first time. The book is divided into eight parts covering: historical background, issues and controversies in psychology; biological bases of psychology; cognitive psychology; animal behaviour; human development; social psychology; personality and atypical behaviour; research methods. The text is fully illustrated and features chapter objectives, chapter summaries, self-assessment questions, on-page glossary definitions and further reading lists to help consolidate students' learning. All adopters of this textbook can gain free access to the Companion Website, which is

designed to meet the needs of the busy lecturer. It includes a wide selection of material to support the book's use in the classroom or lecture hall; essay questions, suggested topics for seminar discussions, over 500 additional questions including multiple choice, and overhead transparency masters (available in PowerPoint or hardcopy). Su finalidad es ofrecer una visión actual y práctica de las decisiones y actividades que conforman la moderna Dirección de Operaciones. El libro se divide en dos partes claramente diferenciadas: una primera dedicada a analizar las principales decisiones estratégicas y una segunda centrada en las decisiones tácticas. En ambas partes se han introducido suplementos cuantitativos en los que se analizan algunas de las herramientas matemáticas necesarias para facilitar la toma de decisiones del Director de Operaciones. Now in its 28th year, the Yearbook of European Law is one of the most highly respected periodicals in the field. Featuring extended essays from leading scholars and practitioners, the Yearbook has become essential reading for all involved in European legal research and practice. This year's issue includes a special symposium on the recent Kadi case in the European Court of Justice, with contributions by Giorgio Gaja, Christian Tomuschat, Enzo Cannizzaro, Riccardo Pavoni and Martin Scheinin. Throughout this unprecedented crisis which is hitting all major economies in the EU, the escalation of the Eurozone recession increasingly undermines public confidence in the ability of competitive markets to deliver positive outcomes. A debate on the most appropriate way to enforce competition rules, in light of the crisis, is definitely useful. A "relaxed" stance to competition during difficult periods may be tempting and indeed, this has often been the approach used in the past. However, the enforcement of competition rules is no less important during times of crisis than during normal periods. It has also been argued that, when public resources are stretched to the limit and businesses are struggling to survive, competition authorities should seek to focus their limited resources on those anticompetitive practices which are most detrimental to consumer welfare such as cartels. Indeed, if over-enforcement is perhaps undesirable when the economy is functioning well, it will inevitably become more problematic during an economic downturn. In addition, business managers may be increasingly tempted to resort to anticompetitive practices when faced with economic hardship. This book will appeal to judges and lawyers in competition law, European law, business/corporate law and insolvency law ; the study of European competition law, European institutions, national competition authorities, and companies. Clinical Management of Sex Addiction's newest edition updates many of the original chapters from 28 leaders in the field with new findings and treatment methods in the field of sex addiction. With a growing awareness of sex addiction as a problem, plus the advent of cybersex compulsion, professional clinicians are being confronted with sexual compulsion with little clinical or academic preparation. This is the first book distilling the experience of the leaders in this emerging field. It additionally provides new chapters on emerging areas of interest, including partner counseling, trauma and sexual addiction, and adolescent sex addiction. With a focus on special populations, the book creates a current and coherent reference for the therapist who faces quickly escalating new constellations of addictive sexual behavior. Readable, concise and filled with useful interventions, it is a key text for professionals new to the field and a classic reference for all clinicians who treat sex addiction. The proper treatment and choice of the basic data structures is an important and complex part in the process of program construction. Algebraic methods provide techniques for data abstraction and the structured specification, validation and analysis of data structures. This volume originates from a workshop organized within ESPRIT Project 432 METEOR, An Integrated Formal Approach to Industrial Software Development, held in Mierlo, The Netherlands, September 1989. The volume includes five invited contributions based on workshop talks given by A. Finkelstein, P. Klint, C.A. Middelburg, E.-R. Olderog, and H.A. Partsch. Ten further papers by members of the METEOR team are based on talks given at the workshop. The workshop was a successor to an earlier one held in Passau, Germany, June 1987, the proceedings of which were published as Lecture Notes in Computer Science, Vol. 394. Uniform customs administration is of great importance for the EU and the competitiveness of EU businesses in global trade. However, the EU's so-called executive federalism raises the potential for the non-uniform application of EU customs law. This problem has already arisen in the European Communities – Selected Customs Matters WTO dispute settlement. Therefore, the central research question of this book concerns the challenge presented to executive federalism in the EU Customs Union by the WTO. It also examines those safeguard measures for uniform customs administration which are in operation. Valuable empirical analysis of the decision-making procedures and practices of the national customs authorities allows for the fullest understanding of the operation of the customs administration. An important feature of the exploration is its analysis of the reform of EU customs law and of the effectiveness of the European Union's strategies to enhance uniform customs administration. That analysis helps to identify potential weak points in the decentralised administration of EU customs law and suggests ways in which it might be improved. Scholarly, rigorous and timely, this important study will be required reading for all scholars of EU customs law.
