KewlActiveMinds(TM) Workbooks and Practice Worksheets are immersive self-study tools that encourage and stimulate your child's mind, while at the same time letting them have fun learning! Each section is devoted to a specific task, with a structured format to avoid distractions and short enough problems to hold attention. Very easy to use and understand to teach your child with simple, clear lessons and easy to follow exercises presented in an interactive way. A fun and challenging approach to plant the seeds of eagerness to learn and to keep your child's mind sharp. Use daily, a page or two, to keep your child engaged, not taking too long so children don't get bored while building a child's capabilities and confidence! The Books a great addition to regular learning routines and a good method for parents to cope with distance learning. **BENEFITS** Through completing questions we hope to enhance your child's comprehension, active use and development of: • REASONING • PROBLEM SOLVING • COMMUNICATION • CONFIDENCE • MOTIVATION **EASY TO USE & ADDITIONAL RESOURCES** The books are designed to be easy to use, with sequentially numbered Questions and Answer Keys at the end of each Part to allow you to flip back and forth quickly. QR Codes for your smartphone take you to Parent Resources that provide

additional support! **BONUS CONTENT** 1. Success Tracking Sheets - Recording sheets are included to help track a child's progress through the Book and for individual sections, to show how they progress over time. 2. Parts Quizzes - Mixed question quizzes are included at the end of every Part to show how well your child has grasped the concepts throughout the material. 3. Downloadable Resources - You can use clear overlay sheets to preserve the practice worksheets and download additional Tracking Sheets as a means of cost-effective use of learning resources. Get your brain working with 200 grid-based logic puzzles from the Puzzle Baron! Filled with complex and fun brain teasers that range in difficulty, this book will put your mind into overdrive with hours of brain-challenging fun. Using the given backstory and list of clues, readers use pure logic to deduce the correct answer for each fiendishly tricky puzzle in Puzzle Baron's Logic Puzzles. Bring out your competitive side and check your stats against the average completion time, the record completion time, and the percentage of people who finish the puzzle. Check your work against the answer key and see how logical you really are! Perfect for adults or children, Puzzle Baron's Logic Puzzles is the ultimate challenge for those who love piecing clues and facts together. The brain is a wonderful thing to tease! Parents and children will enjoy working together through these colourful sticker workbooks, designed to support maths work in school and teach new maths skills. Chemical word scrambles are an exciting new form of word puzzles. You don't need to know any chemistry! These chemical word scrambles will appeal to all word puzzle lovers, whether or not they also enjoy science. Each word is composed of symbols from the periodic table, instead of letters; but you don't need to be familiar with the periodic table to solve the word scrambles. Here is an example: The words BRaIn PoWEr are composed of the following symbols for chemical elements: B for boron, Ra for radium, In for indium, Po for polonium, W for tungsten, and Er for erbium. In chemical word scrambles, the words have been scrambled by rearranging the symbols - not the letters. Symbols that have two letters - like He for helium and Nd for neodymium - can't be split or have their letters reordered. This creates a significant distinction between ordinary word scrambles and chemical word scrambles. For example, the symbols Er, V, S, and Es may be combined to form the word SErVEs, but not the word SEVERs because symbols would have to be split to form SEVERs. One neat difference between ordinary word scrambles and chemical word scrambles is that chemical word scrambles allow us to make use of a vocabulary of longer words without effectively increasing the difficulty of the puzzle. For example, the word VERBAL is a 6-letter word, but only a 4-symbol word. When trying to rearrange the symbols Al, Er, B, and V to form the word VERBAL, there are fewer permutations to consider compared to

rearranging the 6 letters A, l, e, r, b, and v to form the word verbal. We saw this as an excellent opportunity to make word scramble puzzles that involve a vocabulary of longer words. The level of difficulty of this Chemical Word Scrambles puzzle book is HARD. This book involves words that mostly have 6 to 7 symbols, and therefore 6 to 14 letters; all of the challenge words of this HARD book have 8 symbols. (There is also an EASY book with 4 to 5 symbol words, and a MEDIUM book with 6 symbols. Puzzlers who can solve harder word scrambles may want to begin with the EASY volume to get the hang of unscrambling words in terms of chemical symbols before moving onto MEDIUM or HARD.) Each puzzle features a challenge word made by rearranging the first symbol of each word. A unique feature of this book is that there is a Hints section at the back separate from the Answers section, for puzzlers who may be stuck and want to check just the first letter of the solution. Discover the educational power of puzzle-based learning. Understand the principles of effective game design, the power of well-crafted narratives and how different game mechanics can support varied learning objectives. Applying escape room concepts to the classroom, this book offers practical advice on how to create immersive, collaborative learning experiences for your students without the need for expensive resources and tools. Packed with examples, including a full sample puzzle game for you to use with your students, this book is a primer for classroom teachers on designing robust learning activities using problem-solving principles. Hangman Puzzles takes the famous two-player game and turns it into a one-player trivia game of deduction. On his run, he finds a dead man hanging from a tree. The book features 100 puzzles split into two sections with varying levels of difficulty. Each game has a category clue and a unique way of solving the puzzle. From simple vocabulary to extended quotes, you'll be guessing to solve a variety of words and phrases. Each puzzle comes with a category and a visual hint to help you solve the puzzle. Scratch off the letter's clue to find what positions in the phrase the letter falls on. If you guess wrong, you add another segment to the poor man's body. Guess wrong five times and you lose. If you run out of guesses, an answer key in the back will help fill in the blanks. VERBAL REAcTiONS are a new form of word scrambles with a chemical flavor. You don't need to know any science to be able to solve VERBAL REAcTiONS puzzles, but the puzzles bear a resemblance to chemical reactions. **EXAMPLE:** Here is a sample: Es + 2 S + P + Si + 2 O + N --> _____. This VERBAL REAcTiON is a word scramble consisting of one Es, two S's, one P, one Si, two O's, and one N. That is, the word scramble contains the elements Es, S, S, P, Si, O, O, and N. Unscramble these elements to form an 8-symbol word (that's why there are 8 blanks in the puzzle). **ANSWER:** For this puzzle, the answer is P O S S Es Si O N (possession). These

VERBAL ReACTiONS resemble chemical reactions in two ways. First, the scrambled elements appear added together on the left of the reaction with coefficients (like the number 2 in the puzzle above) telling you how many of each element the solution contains, and you fill in the result of the VERBAL ReACTiON by rearranging the elements and writing them on the blanks on the right side of the reaction. Secondly, all of the solutions are chemical words. A chemical word is a word that can be made using symbols from the periodic table. For example, the chemical word POSSEsSiON is made using the symbols for phosphorus (P), oxygen (O), sulfur (S), Einsteinium (Es), silicon (Si), and nitrogen (N). You don't need to be familiar with the periodic table to solve these problems; nor do you need to know any chemistry. You just need to be able to count and unscramble elements to make words. This 'Easy' volume consists of words with 4 to 5 symbols, which involves familiarity with common 4 to 10 letter words. Other 'Medium' and 'Hard' volumes consist of longer words. A unique feature of this book is that there is a Hints section at the back separate from the Answers section, for puzzlers who may be stuck and want to check just the first letter of the solution. MORE EXAMPLES: (1) S + Ni + Ge + U --> _____. (2) 2 C + N + 2 I + P --> _____. (3) Ti + C + Cr + P + Y --> _____. (4) 2 C + U + 2 S + Es --> _____. You can find the answers below. Note that this easy volume consists of chemical words with 4 to 5 symbols. We recommend starting with our easy puzzles before tackling the medium or hard puzzles (available in separate volumes). EDITIONS: This book is available in paperback in 5.5" x 8.5" (portable size), 8.5" x 11" (large size), and as an eBook. This 5.5" x 8.5" edition is the most portable, while the details of the figures - including the periodic tables - are most clear in the large size and large print edition. However, the paperback editions are in black-and-white, whereas the eBooks are in color.

OVERVIEW: This book focuses on fundamental chemistry concepts, such as understanding the periodic table of the elements and how chemical bonds are formed. No prior knowledge of chemistry is assumed. The mathematical component involves only basic arithmetic. The content is much more conceptual than mathematical.

AUDIENCE: It is geared toward helping anyone - student or not - to understand the main ideas of chemistry. Both students and non-students may find it helpful to be able to focus on understanding the main concepts without the constant emphasis on computations that is generally found in chemistry lectures and textbooks.

CONTENTS:

- (1) Understanding the organization of the periodic table, including trends and patterns.
- (2) Understanding ionic and covalent bonds and how they are formed, including the structure of valence electrons.
- (3) A set of rules to follow to speak the language of chemistry fluently: How to name compounds when different types of compounds follow different naming schemes.
- (4) Understanding chemical reactions, including how to balance them and a survey of important reactions.
- (5) Understanding the three phases of matter: properties of matter, amorphous and crystalline solids, ideal gases, liquids, solutions, and acids/bases.
- (6) Understanding atomic and nuclear structure and how it relates to chemistry.
- (7) VERBAL ReAcTiONS: A brief fun diversion from science for the verbal side of the brain, using symbols from chemistry's periodic table to make word puzzles.

ANSWERS: Every chapter includes self-check exercises to offer practice and help the reader check his or her understanding. 100% of the exercises have answers at the back of the book.

COPYRIGHT: Teachers who purchase one copy of this book or borrow one copy of this book from a library may reproduce selected pages for the purpose of teaching chemistry concepts to their own students. A lively and engaging look at logic puzzles and their role in mathematics, philosophy, and recreation Logic puzzles were first introduced to the public by Lewis Carroll in the late nineteenth century and have been popular ever since. Games like Sudoku and Mastermind are fun and engrossing recreational activities, but they also share deep foundations in mathematical logic and are worthy of serious

intellectual inquiry. Games for Your Mind explores the history and future of logic puzzles while enabling you to test your skill against a variety of puzzles yourself. In this informative and entertaining book, Jason Rosenhouse begins by introducing readers to logic and logic puzzles and goes on to reveal the rich history of these puzzles. He shows how Carroll's puzzles presented Aristotelian logic as a game for children, yet also informed his scholarly work on logic. He reveals how another pioneer of logic puzzles, Raymond Smullyan, drew on classic puzzles about liars and truth-tellers to illustrate Kurt Gödel's theorems and illuminate profound questions in mathematical logic. Rosenhouse then presents a new vision for the future of logic puzzles based on nonclassical logic, which is used today in computer science and automated reasoning to manipulate large and sometimes contradictory sets of data. Featuring a wealth of sample puzzles ranging from simple to extremely challenging, this lively and engaging book brings together many of the most ingenious puzzles ever devised, including the "Hardest Logic Puzzle Ever," metapuzzles, paradoxes, and the logic puzzles in detective stories. Artists and scientists view the world in quite different ways. Nevertheless, they are united in a search for hidden order beneath surface appearances. The quest for eternal geometrical designs is also seen in the sacred mathematical patterns created by the world's great religions. Tibetan monks fashion chalk mandalas representing the emergence of order in the universe. Moslem architects wrap their buildings in elaborate abstract tessellating designs. Celestial Tapestry places mathematics within a vibrant cultural and historical context. Threads are woven together telling of surprising influences that pass between the Arts and Mathematics. The story involves intriguing characters: the soldier who laid the foundations for fractals and computer art while recovering in hospital after suffering serious injury in the First World War; the mathematician imprisoned for bigamy whose books had a huge influence on twentieth century art; the pioneer clockmaker who suffered from leprosy; the Victorian housewife who amazed mathematicians with her intuition for higher-dimensional space. Welcome to this fantastic collection of times tables puzzles, which make the perfect way to put your multiplication skills to the test! Featuring the full times tables for the 2 through to the 12-times table, this book contains 50 puzzles that will put your times tables skills to the test. They are a great way for children to learn to recognise the numbers in each times table, familiarise themselves with the numbers, and therefore learn each of the times tables in an accessible and engaging manner. Each puzzle contains a large grid of numbers from a particular times table. For instance, in a four-times table puzzle, every number will be between 1 and 48 (which is 4x12). You must find and colour in all the squares that contain a number in the four-times table, also known as a multiple of four. Once complete, you will create a picture! Full answers are included at the back of the book so if you get stuck or want to check your solutions, it is easy to do so. These times tables picture number puzzles make the perfect way to practice your times tables skills in a fun, enjoyable manner. It really is true that practice

makes perfect, and by tackling all the puzzles in this book you'll get lots and lots of practice at recognising which numbers are in each times tables, and will be tackling your times tables like a pro by the time you finish the book! This new puzzle is like Sudoku that is used in many new books. But this one is different. It uses letters instead of numbers. It uses nine letters instead of nine numbers and the letters are not always the same. Each puzzle has a list of the nine letters that are being used in each puzzle. Just like the Sudoku puzzles there are nine groups of nine letters. There will be 2 parts for these puzzles. The first part is like the Sudoku puzzles. There will be a 9X9 table with some of the letters missing. This is just like the Sudoku puzzles, only it uses letters. This puzzle is still the same but it may use f t h b m g o e a, or, s m l g b y i o u. Generally, 6 consonants and 3 vowels are used, but there may be times when 7 consonants and 2 vowels, or 5 and 4 are being used. There is also a blank table which is 4 columns by 9 rows. That is the area in which you will record the second part. You have already figured out what all the letters are; now you get to see how many words you can find. This is Part 2. Part 2 is completely different from the Sudoku. This is where you go through your answers to part one and see how many words you can find. Some of the puzzles have as many as 15 words and some as many as 25 words. It is all dependent on the letters that are used. This is the part that can really be difficult. You will be going through the puzzle, after you have done the hard work of finding all the letters, and trying to find words. All words in the answers are at least 3 letters long. "The Canterbury Puzzles, and Other Curious Problems" by Henry Ernest Dudeney. Published by Good Press. Good Press publishes a wide range of titles that encompasses every genre. sciences in grades 8-12 will welcome this activity book centered on six OC data puzzles that foster critical-thinking skills in students and support science and math standards. Earth Science Puzzles presents professionally gathered Earth science data including graphs, maps, tables, images, and narratives and asks students to step into scientists' shoes to use temporal, spatial, quantitative, and concept-based reasoning to draw inferences from the data." This classic from Bob Pike contains 101 mind stimulating game activities from the Creative Training Techniques Newsletter. These fast action games can be quickly and easily launched with any size group. Each game lists training objective, time, materials required and "The Exercise in Action". Finally, a crossword dictionary with all the words solvers need--and none of the ones they don't! When it comes to puzzle dictionaries, it's the "quality" of what's inside that counts. To make the dictionary even easier to use, the most popular answers stand out in easy-to-see red, while charts highlight frequently sought-after information such as Oscar winners and Popes' names. Crossword fans will keep this right next to their favorite puzzles! VERBAL REACTIONS are a new form of word scrambles with a chemical flavor. You don't need to know any science to be able to solve VERBAL REACTIONS puzzles, but the puzzles bear a resemblance to chemical reactions. Here is a sample: $Es + 2 S + P + Si + 2 O + N \rightarrow \underline{\hspace{2cm}}$. This VERBAL REACTION is a word scramble consisting of one Es, two S's, one P, one Si, two O's, and one N. That is, the word scramble contains the elements Es, S, S, P, Si, O, O, and N. Unscramble these elements to form an 8-symbol word (that's why there are 8 blanks in the puzzle). For this puzzle, the answer is P O S S Es Si O N (possession). These VERBAL REACTIONS resemble chemical reactions in two ways. First, the scrambled elements appear added together on the left of the reaction with coefficients (like the number 2 in the puzzle above) telling you how many of each element the solution contains, and you fill in the result of the VERBAL REACTION by rearranging the

elements and writing them on the blanks on the right side of the reaction. Secondly, all of the solutions are chemical words. A chemical word is a word that can be made using symbols from the periodic table. For example, the chemical word POSSESSION is made using the symbols for phosphorus (P), oxygen (O), sulfur (S), Einsteinium (Es), silicon (Si), and nitrogen (N). You don't need to be familiar with the periodic table to solve these problems; nor do you need to know any chemistry. You just need to be able to count and unscramble elements to make words. This 'Hard' volume consists of words with 7 to 8 symbols, which involves familiarity with common 8 to 14 letter words. Other 'Medium' and 'Easy' volumes consist of shorter words. A unique feature of this book is that there is a Hints section at the back separate from the Answers section, for puzzlers who may be stuck and want to check just the first letter of the solution. MORE EXAMPLES: (1) $S + Ni + Ge + U \rightarrow \underline{\hspace{2cm}}$. (2) $2 C + N + 2 I + P \rightarrow \underline{\hspace{2cm}}$. (3) $Ti + C + Cr + P + Y \rightarrow \underline{\hspace{2cm}}$. (4) $2 C + U + 2 S + Es \rightarrow \underline{\hspace{2cm}}$. You can find the answers at the end of this paragraph. Note that this hard volume consists of chemical words with 7 to 8 symbols, which are longer than the examples shown here. We recommend starting with our easy or medium puzzles before tackling these hard puzzles (available in separate volumes). ANSWERS: (1) GeNiUS (2) PICNIC (3) CrYPTiC (4) SUCCEsS.
