**International Dispute Resolution and the Public Policy Exception** Mar 14 2022 Despite the unprecedented growth of arbitration and other means of ADR in treaties and transnational contracts in recent years, there remains no clearly defined mechanism for control of the system. One of the oldest yet largely marginalized concepts in law is the public policy exception. This doctrine grants discretion to courts to set aside private legal arrangements, including arbitration, which might be considered harmful to the "public". The exceptional and vague nature of the doctrine, along with the strong push of actors in dispute resolution, has transformed it, in certain jurisdictions, to a toothless doctrine. At the international level, the notion of transnational public policy has been devised in order to capture norms that are "truly" transnational and amenable for application in cross-border litigations. Yet, despite the importance of this discussion—a safety valve and a control mechanism for today's international and domestic international dispute resolution—no major study has ventured to review and analyze it. This book provides a historical, theoretical and practical background on public policy in dispute resolution with a focus on cross-border and transnational disputes. Farshad Ghodoosi argues that courts should adopt a more systemic approach to public policy while rejecting notions such as transnational public policy, which limits the application of those norms with mandatory nature. Contrary to the current trend, the book invites the reader to re-conceptualize the role of public policy, and transnational dispute resolution, in order to have more sustainable, fair and efficient mechanisms for resolving disputes outside of national courts. The book sheds light on one of the most important yet often-neglected control mechanisms of today's international dispute resolution and will be of particular interest to students and academics in the fields of International Investment Law, International Trade Law, Business and Economics.

*Conflict Resolution Beyond the Realist Paradigm* Feb 01 2021 Conflict Resolution holds the promise of freeing approaches and policies with regard to politics of identity from the fatalistic grip of realism. While the conceptual literature on identity and conflicts has moved in this alternative direction, conflict resolution practice continues to rely on realist frames and acts as an unwanted auxiliary to traditional international relations. Perpetuation of conflict discourses, marginalization, and exclusion of affected populations are widespread. They are caused by the overreliance of conflict resolution practice on the binary frames of classic IR paradigms and also by the competitive and hierarchical relationships within the field. Philip Gamaghlyan relies on participatory action research and collective autoethnography to expose patterns of exclusion and marginalization as well as the paradoxical reproduction of conflict-promoting frames in current conflict-resolution practice applied to the Nagorno-Karabakh and Syrian crises. He builds on the work of postmodernist scholars, on reflective practice, and on discourse analysis to explore alternative and inclusive strategies with a transformative potential. The IR discipline that has dominated policymaking is only one possible lens, and often a deficient one, for defining, preventing, or resolving contemporary conflicts wrapped in identity politics. Other conceptual frameworks can help to rethink our understanding of identity and conflicts and reconstruct them as performative and not static phenomena. These transformative frameworks are increasingly influential in the conflict resolution field and can be applied to policymaking.

*Conflict Resolution and Public Policy* Feb 25 2023 This work represents a broad-based perspective of the conflict resolution process. While related books have tended to specialize on specific settings, this volume gives in-depth treatment of four various settings--environmental risk resolution, rule-making in the public sector, consumer disputes, and contracts and the courts. It also examines future models for resolving disputes. With its

contributions from both practitioners and theorists in the art/science of conflict resolution, this volume properly emphasizes the important role that public policy plays in the settlement of societal conflict. The first section of the book deals with dispute resolution related to environmental issues. Articles in this section address negotiations in the area of hazardous waste, present a review of the timber, fish, and wildlife policy negotiations of Washington State, and examine environmental regulation in the Reagan era. The second section focuses on consumer disputes in two areas--utilities and those exposed unwittingly to asbestos. The third section discusses contracts and the limitations of courts as a higher authority. The fourth section reviews negotiated rule-making in administrative settings. The final portion presents a modern approach to dispute resolution using decision-aiding software. This book serves as valuable reading for anyone interested in the interconnected fields of dispute resolution and public policy.

*Ripe for Resolution* Mar 02 2021 What causes local conflict in Africa and the rest of the Third World? What role, if any, can the U.S. play in helping to resolve these conflicts, and when is the ripe moment for a response by an external power? This new study, written by the internationally renowned Africanist I. William Zartman and undertaken as part of the Africa Project of the Council on Foreign Relations, examines the causes and nature of African conflict and addresses the issue of how foreign powers can productively contribute to the management and resolution of such conflicts without resorting to the use of military force. The book focuses on four case studies of local conflict and external response-in the Western Sahara, the Horn of Africa, the Shaba province in Zaire, and Namibia-to assess various approaches to conflict management, and offers guidelines for identifying the critical moment for effective external response. Zartman also evaluates U.S. policy toward Third World conflict and spells out a policy toward Africa and the Third World in general that is based on preemptive treatment rather than military intervention.

**Alternative Dispute Resolution and Peace-building in Africa** Jul 06 2021 Conflicts in Africa have a great deal in common, and striking parallels can be drawn between them at all levels. Dynamics affecting the most complex war-time conflicts, civil unrest and other macro disputes are in play even in the smallest community conflicts. The converse is also true: lessons learned through community mediation, for example in South Africa, are applicable to the most complex and largest conflicts to be found on the continent. Together, the eleven chapters in this publication, in addition to the prologue and epilogue, suggest that a comprehensive assessment of efforts and investments in conflict resolution and peace studies in Africa since the mid-1990s is due in order to identify lessons and challenges, as well as best practices. Just as conflict dynamics are comparable between African conflicts, whether large or small, local or international, so are alternative dispute resolution processes. Effective approaches to resolving large-scale conflicts and civil wars are effective at the community level, and ineffectual techniques at the community level are just as likely to be counter-productive in mediating international disputes. While there may be some differences in mediating macro- and micro-conflicts (such as the time required, the need for negotiation teams, and the complexities of agenda development or pre-negotiations), as far as the mediation process is concerned, the differences are more like variations on a theme than real substantive dissimilarities. This volume provides case studies of programs and policies, and legislations on alternative dispute resolution and peace building, and examines and proposes some new, promising ideas for conflict prevention, as well as maintenance of peace, justice and security in Africa.

*Environmental Dispute Resolution* Aug 19 2022 This book has its origins in an M.I.T. research project that was funded by the U.S. Environmental Protection Agency (EPA). Our immediate objective was to prepare a set of case studies that examined bargaining and negotiation as they occurred between government, environmental advocates, and regulatees throughout the traditional regulatory process. The project was part of a larger effort by the EPA to make environmental regulation more efficient and less litigious. The principal investigator for the research effort was Lawrence Suskind of the Department of Urban Studies and Planning. Eight case studies were prepared under the joint supervision of Suskind and the authors of this book. Studying the negotiating behavior of parties as we worked our way through an environmental dispute proved enlightening. We observed missed opportunities for settlement, negotiating tactics that backfired, and strategies that appeared to be grounded more in intuition than in thoughtful analysis. At the same time, however, we were struck by how often the parties ultimately managed to muddle through. People negotiated not out of some idealistic commitment to consensus but because they thought it better served their own interests. When some negotiations reached an impasse, people improvised mediation. These disputants succeeded in spite of legal and institutional barriers, even though few of them had a sophisticated understanding of negotiation.

**Negotiating Buck Naked** Aug 27 2020 Negotiating Buck Naked examines the accord closely. Why did the violence end? How was the accord reached? What factors enabled it to succeed when numerous other interventions had failed? How did it change the patterns of conflict between the factions? To answer these questions, Cran develops a theoretical framework for understanding the process of dispute resolution, emphasizing that competing discourses are juxtaposed and that it is these different but equally valid narratives that must be negotiated. Using this approach, Cran extracts from the Doukhobor conflict valuable lessons for understanding the nature of both terrorism and hegemonic practices, and traces how we view conflict and intervention from a Western perspective.

**Culture & Conflict Resolution** May 24 2020 After years of relative neglect, culture is finally receiving due recognition as a key factor in the evolution and resolution of conflicts. Unfortunately, however, when theorists and practitioners of conflict resolution speak of culture, they often understand and use it in a bewildering and unhelpful variety of ways. With sophistication and lucidity, "Culture and Conflict Resolution" exposes these shortcomings and proposes an alternative conception in which culture is seen as dynamic and derivative of individual experience. The book explores divergent theories of social conflict and differing strategies that shape the conduct of diplomacy, and examines the role that culture has (and has not) played in conflict resolution. The author is as forceful in critiquing those who would dismiss or diminish culture's relevance as he is trenchant in advocating conflict resolution approaches that make the most productive use of a coherent concept of culture. In a lively style, Avruch challenges both scholars and practitioners not only to develop a clearer understanding of what culture is, but also to take that understanding and incorporate it into more effective conflict resolution processes."

**Commercial Conflict Management and Dispute Resolution** Dec 19 2019 Commerce is inherently complex and the sums of money involved can be astronomical, so it is no surprise that conflicts and disputes are all too common. There are numerous techniques designed to resolve these problems, and this book summarizes the most important of these, as well as alternative dispute resolution methods. The reader seeking a deeper

understanding of these procedures will also find clear explanations of the principles and methods for conflict management, such as negotiation, risk management, mediation and conciliation. As well as outlining these different techniques, guidance on which approach is appropriate in common situations is also given, helping the reader apply what they have learned to the real world. The significance of cultural issues is explained, before the reader is presented with suggestions for how to take these into account. Throughout, the book is illustrated with case studies from examples as diverse as Mumbai's DabbaWalla, The First World War and Terminal 5 at London Heathrow. Written with undergraduate students in mind, this book also serves to give a neat and brief overview for professionals. Those studying or working in commerce generally, construction project management, construction management, and construction law will find this to be an invaluable book.

**Managing Environmental and Public Policy Conflicts** Jun 24 2020

Conflict Resolution after the Pandemic Jan 12 2022 In this edited volume, experts on conflict resolution examine the impact of the crises triggered by the coronavirus and official responses to it. The pandemic has clearly exacerbated existing social and political conflicts, but, as the book argues, its longer-term effects open the door to both further conflict escalation and dramatic new opportunities for building peace. In a series of short essays combining social analysis with informed speculation, the contributors examine the impact of the coronavirus crisis on a wide variety of issues, including nationality, social class, race, gender, ethnicity, and religion. They conclude that the period of the pandemic may well constitute a historic turning point, since the overall impact of the crisis is to destabilize existing social and political systems. Not only does this systemic shakeup produce the possibility of more intense and violent conflicts, but also presents new opportunities for advancing the related causes of social justice and civic peace. This book will be of great interest to students of peace studies, conflict resolution, public policy and International Relations.
