Lissianna has been
spending her
centuries pining for
Mr. Right, not just a
quick snack, and
this sexy guy she
finds in her bed
looks like he might

there's another,

issue: her tendency

of blood and
especially annoying
quirk for a vampire.
Of course it doesn't
hurt that this man
has a delicious-
looking neck. What
kind of cold-

woman could resist
a bite of that?

This book introduces entirely new invariants never considered before, in homological algebra and commutative (and even non-commutative) algebra. The C-completion $C(M)$, and higher C-completions, $C_n(M)$, are defined for an arbitrary left module M over a topological ring A . Spectral sequences are defined that use these invariants. Given a left module over a topological ring A , under mild conditions the usual

Hausdorff completion: M^{\wedge} can be recovered from the C-completion $C(M)$, by taking the quotient module by the closure of $\{0\}$. The new invariants and tools in this book are expected to be used in the study of p-adic cohomology in algebraic geometry; and also in the study of p-adic Banach spaces — by replacing the cumbersome "complete tensor product" of p-adic Banach spaces, with the more sophisticated "C-complete tensor product", discussed in this book. It is also not unlikely that the further study of these new invariants may well develop into a new branch of abstract mathematics -

connected with commutative algebra, homological algebra, and algebraic topology. Quick Review Series for BDS 3rd Year is an extremely exam-oriented book. descendants who inherits it is destined to develop multiple talents—and the curse of madness. Plagued by hallucinations and nightmares, notorious crime lord Griffin Winters is convinced he has been struck with the Winters Curse. But even as he arranges a meeting with the mysterious woman Adelaide Pyne, he has no idea how closely their fates are bound, for she holds the missing lamp in her possession. Have you always wanted to learn how to speak the Arabic dialects of North Africa? Or learn how to speak the Egyptian, Libyan, Moroccan, Tunisian or the Algerian dialect but simply didn't have the time? Well if so, then, look no further. You can hold in your hands one of the most advanced and revolutionary methods that was ever designed for quickly becoming

conversational in a language. In creating this time-saving program, master linguist Yatir Nitzany spent years examining the twenty-seven most common languages in the world and distilling from them the three hundred and fifty words that are most likely to be used in real conversations. These three hundred and fifty words were chosen in such a way that they were structurally interrelated and, when combined, form sentences. Through various other discoveries about how real conversations work—discoveries that are detailed further in this book—Nitzany created the

necessary tools for linking these words together in a specific way so that you may become rapidly and almost effortlessly conversant—now. If your desire is to learn complicated grammatical rules or to speak perfectly proper and precise Arabic, this book is not for you. However, if you need to actually hold a conversation while on a trip to a North African Arab speaking country, to impress that certain someone, or to be able to speak with your grandfather or grandmother as soon as possible, then the Nitzany Method is what you have been looking for. This method is designed for fluency in a foreign

language, while communicating in the present tense. Nitzany believes that what's most important is actually being able to understand and be understood by another human being right away. More formalized training in grammar rules, etc., can come later. This is one of the several, in a series of instructional language guides, the Nitzany Method's revolutionary approach is the only one in the world that uses its unique language technology to actually enable you to speak and understand native speakers in the shortest amount of time possible. No

more depending on volumes of books of fundamental, beginner, intermediate, and advanced levels, all with hundreds of pages in order to learn a language.
