The vicious close-quarter skirmishes that ensued were every bit as deadly as the aerial dogfights acted out at 30,000 ft by their RAF Spitfire contemporaries. Written by the curator of MGB 81, with contributions from other specialists involved with the boat, the Royal Navy Motor Gun Boat Owners' Workshop Manual is published in association with the Portsmouth Naval Base Property Trust and fully illustrated with archive photos, technical drawings and detailed photography of MGB 81. The very last Empire 'boat remained as a landlocked exhibit in Auckland until it, too, was hauled off for scrapping sometime in 1954. An insight into the design, construction and operation of the feared World War 2 German Type VIIC U-boat. The German Type VIIC U-boat, scourge of Allied shipping convoys during the Second World War, was the workhorse of the German U-boat force. With some 568 Type VIIs in use between 1940 and 1945 it was a potent fighting vessel that could hunt for long periods in the far reaches of the western and southern Atlantic.
