Motion Picture Copyrights & Renewals, 1950-1959 Sep 22 2022 This annotated reference provides information on the copyright status of over 20,000 features, short films, television programs, and documentaries. The United States copyright system allows a film to fall into the public domain if a renewal is not filed in the twenty-eighth year after its release. Such public domain films may be used by anyone for free, but finding out which films are or are not still under copyright can be expensive and tedious. This guide alleviates that expense and drudgery by including all motion pictures registered for copyright in the 1950s, as well as 500 that were received after 1959. The book also includes an overview of the copyright system and sample certificates. All renewals of copyrights are noted, allowing readers to clearly see which items are or are not in the public domain.

Gaudi - 2013 May 06 2021 Wolf Haas' Detective Brenner series has become wildly popular around the world for a reason: They're timely, edgy stories told in a wry, quirky voice that's often hilarious, and with a protagonist it's hard not to love. In this episode, Brenner forced out of the police force tries to get away from detective work by taking a job as the personal chauffeur for two-year-old Helena, the daughter of a Munich construction giant and a Viennese abortion doctor. One day, while Brenner's attention is turned to picking out a chocolate bar for Helena at a gas station, Helena gets snatched from the car. Abruptly out of a job, Brenner decides to investigate her disappearance on his own. With both parents in the public eye, there's no scarcity of leads the father's latest development project has spurred public protest, and the mother's clinic has been targeted by the zealous leader of an anti-abortion group. Brenner and God is told with a dark humor that leaves no character, including Brenner, unscathed. Haas tells the story of a fallible hero who can be indecisive and world-weary, baffled and disillusioned by what he finds, but who presses forward nonetheless out of a stubborn sense of decency a two-year-old is kidnapped, so you find her, because that's just what you do.

Wake Up, Woods Oct 11 2021 Early in the year, our North American forests come to life as native wildflowers start to push up through patches of snow. With longer days and sunlight streaming down through bare branches of towering trees, life on the forest floor awakens from its winter sleep. Plants such as green dragon, squirrel corn, and bloodroot interact with their pollinators and seed dispersers and rush to create new life before the trees above leaf out and block the sun's rays. Wake Up, Woods showcases the splendor of our warming forests and offers clues to nature's annual springtime floral show as we walk in our parks and wilderness areas, or even in shade gardens around our homes. Readers of Wake Up, Woods will see that Gillian Harris, Michael Homoya and Shane Gibson, through illustrations and text, present a captivating look into our forests' biodiversity, showing how species depend on plants for food and help assure plant reproduction. This book celebrates some of nature's most fascinating moments that happen in forests where we live and play.

A new Patient Education chapter covers teaching tips and cultural considerations.

Differential Topology Aug 09 2021 Differential Topology provides an elementary and intuitive introduction to the study of smooth manifolds. In the years since its first publication, Guillemin and Pollack's book has become a standard text on the subject. It is a jewel of mathematical exposition, judiciously picking exactly the right mixture of detail and generality to display the richness within. The text is mostly self-contained, requiring only undergraduate analysis and linear algebra. By relying on a unifying idea--transversality--the authors are able to avoid the use of big machinery or ad hoc techniques to establish the main results. In this way, they present intelligent treatments of important theorems, such as the Lefschetz fixed-point theorem, the Poincaré-Hopf index theorem, and Stokes theorem. The book has a wealth of exercises of various types. Some are routine explorations of the main material. In others, the students are guided step-by-step through proofs of fundamental results, such as the Jordan-Brouwer separation theorem. An exercise section in Chapter 4 leads the student through a construction of de Rham cohomology and a proof of its homotopy invariance. The book is suitable for either an introductory graduate course or an advanced undergraduate course.

Composite Solutions for Ballistics Feb 27 2023 Academic researchers who are working on the development of composite materials for ballistic protection need a deeper understanding on the theory of material behavior during ballistic impact. Those working in industry also need to select proper composite constituents, to achieve their desired characteristics to make functional products. Composite Solutions for Ballistics covers the different aspects of ballistic protection, its different levels and the materials and structures used for this purpose. The emphasis in the book is on the application and use of composite materials for ballistic protection. The chapters provide detailed information on the various types of impact events and the complexity of materials to respond to those events. The characteristics of ballistic composites and modelling and simulation results will enable the reader to better understand impact mechanisms according to the theory of dynamic material behavior. A complete description of testing conditions is also given that includes sensors and high-speed devices to monitor ballistic events. The book includes detailed approaches and schemes that can be implemented in academic research into solutions for ballistic protection in both theoretical and experimental fields, to find solutions for existing and next generation threats. The book will be an essential reference resource for materials scientists and engineers, and academic and industrial researchers working in composite materials and textiles for ballistic protection, as well as postgraduate students on materials science, textiles and mechanical engineering courses. Discusses the fundamentals of impact response mechanisms and related solutions covering advantages and disadvantages for both existing and next generation applications Includes various methods for evaluation of ballistic constituents according to economic and environmental criteria, types of green ballistics are considered to enhance sustainable production of applications as well as hybrid composites from natural wastes Discusses selection methodologies for ballistic applications and detailed information on the use of textiles for reinforcement fabrication

Economics for Managers, Global Edition Feb 03 2021 For one semester MBA Managerial Economics courses Economics for Managers presents the fundamental ideas of microeconomics and macroeconomics and integrates them from a managerial decision-making perspective in a framework that can be used in a single-semester course. To be competitive in today's business environment, managers must understand how economic forces affect their business and the factors that must be considered when making business decisions. This is the only book that provides business students and MBAs with a thorough and applied understanding of both micro- and macroeconomic concepts in a way non-economics majors can understand. The third edition retains all the same core concepts and straightforward material on micro- and macroeconomics while incorporating new case material and real-world examples that relate to today's managerial student. Mobile Web 2.0 Jul 08 2021 From basic concepts to research grade material, *Mobile Web 2.0: Developing and Delivering Services to Mobile Devices* provides complete and up-to-date coverage of the range of technical topics related to Mobile Web 2.0. It brings together the work of 51 pioneering experts from around the world who identify the major challenges in Mobile Web 2.0 applications and provide authoritative insight into many of their own innovations and advances in the field. To help you address contemporary challenges, the text details a conceptual framework that provides modeling facilities for context-aware, multi-channel Web applications. It compares various platforms for developing mobile services—from the developer and user perspectives—and explains how to use high-level modeling constructs to drive the application development process through automatic code generation. Proposes an expanded model of mobile application context Explores mobile social software as an Information and Communications Technology (ICT) Discusses the effect of context on mobile usability Through empirical study, the book tests a number of hypotheses on the use of software implementation technology and location context in mobile applications. It introduces Reusable End-User Customization (REUC)—a technique that allows users to adapt the layout of Web pages and automatically reapplies those preferences on subsequent visits. It also investigates the need for non-visual feedback with long system response times, particularly when downloading Web pages to mobile devices.

CBT for College Students with ADHD Aug 29 2020 This book provides an overview of the ACCESS program, a mental health program that has been developed and tested as an efficacious treatment for college students with ADHD. This program is at the cutting edge of clinical research, incorporating treatment strategies that allow for dissemination in real world settings in order to effectively assist college students experiencing difficulties in their academic, personal, social, and emotional functioning. As cognitive behavioral approaches have proved to be the most successful psychological treatments to date, the techniques in this volume follow that model in a detailed and nuanced fashion. The authors provide a week by week breakdown of the program, supplemented by handouts and worksheets designed to facilitate better understanding of the areas targeted by the program. Filling a notable gap in research addressing the ADHD college student population, CBT for College Students with ADHD is a crucial resource for campus mental health practitioners as well as a broad range of clinicians dealing with emerging adults.

Getting Over the X Aug 21 2022 It was the stuff dreams were made of. It became the ultimate nightmare. Being the first winner of the X Factor in 2004, Steve Brookstein should have had it all. Instead, he tells a story of a man sold down the river by his own record label as they championed the runner-up, G4, and forced him into an album of cover songs. This is the story of what really happened, from vicious personal attacks by Sharon Osborne and Louis Walsh to threats from Max Clifford about going public. A decade on, and Max Clifford is inside and severely discredited. So, too was Andy Coulson, an editor who ran many of the untrue stories about Steve. He has been dubbed a pub singer, a fake, a flop and bitter as the narrative that begun on the show became adopted by journalists who thought he was fair game, frequently reviewing gigs that they hadn't been to or inventing quotes he hadn't said, and always regulated by a toothless Press Complaints Commission. Ten years on, Steve is now able to lift the lid on the show itself and analyse for the first time exactly what Max Clifford said when he rang to say, 'Talk to the press and we'll bury you.'

Plastics Additives Dec 25 2022 Although plastics are extremely successful commercially, they would never reach acceptable performance standards either in properties or processing without the incorporation of additives. With the inclusion of additives, plastics can be used in a variety of areas competing directly with other materials, but there are still many challenges to overcome. Some additives are severely restricted by legislation, others interfere with each other-in short their effectiveness varies with circumstances. *Plastics Additives* explains these issues in an alphabetical format making them easily accessible to readers, enabling them to find specific information on a specific topic. Each additive is the subject of one or more articles, providing a succinct account of each given topic. An international group of experts in additive and polymer science, from many world class companies and institutes, explain the recent rapid changes in additive technology. They cover novel additives (scorch inhibitors, compatibilizers, surface-modified particulates etc.), the established varieties (antioxidants, biocides, antistatic agents, nucleating agents, fillers, fibres, impact modifiers, plasticizers) and many others, the articles also consider environmental concerns, interactions between additives and legislative change. With a quick reference guide and introductory articles that provide the non-specialist and newcomer with relevant information, this reference book is essential reading for anyone concerned with plastics and additives.

Intelligent Computing, Communication and Devices Nov 12 2021 In the history of mankind, three revolutions which impact the human life are tool-making revolution, agricultural revolution and industrial revolution. They have transformed not only the economy and civilization but the overall development of the human society. Probably, intelligence revolution is the next revolution, which the society will perceive in the next 10 years. ICCD-2014 covers all dimensions of intelligent sciences, i.e. Intelligent Computing, Intelligent Communication and Intelligent Devices. This volume covers contributions from Intelligent Computing, areas such as Intelligent and Distributed Computing, Intelligent Grid & Cloud Computing, Internet of Things, Soft Computing and Engineering Applications, Data Mining and Knowledge discovery, Semantic and Web Technology, and Bio-Informatics. This volume also covers paper from Intelligent Device areas such as Embedded Systems, RFID, VLSI Design & Electronic Devices, Analog and Mixed-Signal IC Design and Testing, Solar Cells and Photonics, Nano Devices and Intelligent Robotics.
