Commercial herbal medicinal products are increasingly consumed on a regular basis by people in the developed world. Often such products are taken concurrently with conventional medicines, frequently without the knowledge of health care professionals. As more evidence has become available, there has been an increasing awareness of the potential and actual problems of interactions, often dangerous, between conventional medicines and herbal medicines. This proposed new major reference brings together available data on approximately 200 of the most commonly used herbal medicines in highly structured, rigorously scientific monographs. Although our texts on herbal medicines and drug interactions include the major well-known interactions, this text is able to treat the subject in considerably more detail. Noted herbalist Matthew Wood brings twenty-five years of clinical experience to this comprehensive book on medicinal plants. The first in a two-volume set, *The Earthwise Herbal* profiles Old World plants (volume two will treat American plants). Organized alphabetically, the book encompasses all of the major—and many of the secondary—herbs of traditional and modern Western herbalism. Author Wood describes characteristic symptoms and conditions in which each plant has proved useful in the clinic, often illustrated with appropriate case histories. In addition, he takes a historical view based on his extensive study of ancient and traditional herbal literature. Written in an easy, engaging, non-technical style, *The Earthwise Herbal* offers insight into the “logic” of the plant: how it works, in what areas of the body it works, how it has been used in the past, what its pharmacological constituents indicate about its use, and how all these different factors hang together to produce a portrait of the plant as a whole entity. Ideal for beginners, serious students, or advanced practitioners, *The Earthwise Herbal* is also useful for homeopaths and flower essence practitioners as it bridges these fields in its treatment of herbal medicines. The fourth in Dr. Stansbury's acclaimed five-volume masterwork for herbalists and medical professionals—the best resource available for the modern clinical practice of Western herbal medicine *Herbal Formularies for Health Professionals* is a comprehensive, five-volume reference for herbalists, physicians, nurses, and allied health professionals. Dr. Jill Stansbury draws on decades of clinical experience and her extensive research to provide an unparalleled

range of herbal formulas organized by body system. Volume 4 focuses on herbal formulas for cognitive, neurologic, and emotional conditions, including: Psychiatric disorders such as anxiety, depression, insomnia, dissociative disorders, post-traumatic stress disorder (PTSD), as well as formulas to treat drug addiction Acute and chronic pain such as headaches, sinus pain, muscle pain, neuralgia, gastrointestinal pain, and pain from injuries Peripheral nerve issues such as neuropathy and nerve trauma Central nervous system disorders such as seizures, Parkinson's, and dementia Each chapter includes a section describing individual herbs with tips on their properties, modes of action, and the specific symptoms each plant best addresses. Together, Dr. Stansbury's expert formularies comprise a practical manual for budding and seasoned herbalists alike on the sophisticated art of fine-tuning herbal treatments for the constitution and overall health of an individual patient. The text aims to teach by example, helping clinicians develop their own intuition and ability to create effective herbal formulas.
