Do I Really Have to Teach Reading? Aug 28 2020 "Do I really have to teach reading?" This is the question many teachers of adolescents are asking, wondering how they can possibly add a new element to an already overloaded curriculum. And most are finding that the answer is "yes." If they want their students to learn complex new concepts in different disciplines, they often have to help their students become better readers. Building on the experiences gained in her own language arts classroom as well as those of colleagues in different disciplines, Cris Tovani, author of *I Read It, but I Don't Get It*, takes on the challenge of helping students apply reading comprehension strategies in any subject. In *Do I Really Have to Teach Reading?*, Cris shows how teachers can expand on their content expertise to provide instruction students need to understand specific technical and narrative texts. The book includes: examples of how teachers can model their reading process for students; ideas for supplementing and enhancing the use of required textbooks; detailed descriptions of specific strategies taught in context; stories from different high school classrooms to show how reading instruction varies according to content; samples of student work, including both struggling readers and college-bound seniors; a variety of "comprehension constructors" guides designed to help students recognize and capture their thinking in writing while reading; guidance on assessing students; tips for balancing content and reading instruction. Cris's humor, honesty, and willingness to share her own struggles as a teacher make this a unique take on content reading instruction that will be valuable to reading teachers as well as content specialists.

Understanding and Teaching Reading Comprehension Oct 10 2021 The ultimate aim of reading is not the process but to understand what we read and comprehension can take place at many different levels. There has been an increasing emphasis on the importance of reading comprehension in recent years but despite this there is very little written on this vital topic accessible to trainee and practicing teachers. The Handbook of Reading Comprehension presents an overview of recent findings on reading comprehension and comprehension problems in children. It provides a detailed examination of the characteristics of children who have reading comprehension difficulties, and examines ways in which comprehension can be supported and improved. It is accessibly written for students and professionals with no previous background in the psychology of reading or reading problems. This indispensable handbook asks the question 'what is comprehension?' The authors consider comprehension of different units of language: understanding single words, sentences, and connected prose and outline what readers (and listeners) have to do to successfully understand an extended text. This book also considers comprehension for different purposes, in particular reading for pleasure and reading to learn and explores how reader characteristics such as interest and motivation can influence the comprehension process. Different skills contribute to successful reading comprehension. These include word reading ability, vocabulary knowledge, syntactic skills, memory, and discourse level skills such as the ability to make inferences, knowledge about text structure, and metacognitive skills. The authors discuss how each one contributes to the development of reading comprehension skill and how the development of these skills (or their precursors) in pre-readers, provides the foundation for reading comprehension development. Areas covered include:- Word reading and comprehension Development of comprehension skills Comprehension difficulties Assessment Teaching for improvement Throughout the text successful experimental and classroom based interventions will be highlighted, practical tips for teachers and summary boxes detailing key points and explaining technical terms will be included in each chapter

We want children to be lifelong learners who read actively and independently across the curriculum, who engage their minds and understand what they read. The Toolkit lessons and practices teach kids to use comprehension strategies to "read to learn" as they encounter information and ideas in a wide variety of nonfiction texts." -Stephanie Harvey & Anne Goudvis Learn how to teach nonfiction strategies to intermediate readers and how Stephanie Harvey and Anne Goudvis help students listen to their inner conversation, keep track of their thinking, and monitor their understanding as they read. Through 2 foundational books-The Comprehension Toolkit Teacher's Guide and Monitor Comprehension-and seven online video clips, Steph and Anne provide the lesson plans, teaching language, and tools you'll need to teach students how to use nonfiction reading strategies flexibly across a variety of texts, topics, and subject areas. In the Teacher's Guide, Steph and Anne explain the research and thinking behind The Comprehension Toolkit. They include an overview of the Toolkit's instructional design as well as guidelines for integrating the Toolkit into your literacy curriculum. In addition to describing how to foster an active literacy classroom, the Teacher's Guide shows how to choose texts and apply the strategies in science and social studies, and offers guidelines for assessing student work. When readers monitor their comprehension, they keep track of their thinking while reading. They listen to the voice in their head that speaks to them as the read. They notice when the text makes sense or when it doesn't. Monitor Comprehension helps you teach readers how to "fix up" their comprehension by using a variety of strategies including stopping to refocus thinking, rereading, and reading on. Throughout readers learn to monitor and use strategies to maintain understanding and repair comprehension when it breaks down. The seven accompanying video clips include a video conversation with Dr. P. David Pearson and slideshows of an active literacy classroom, an assessment overview, and strategy instruction in science and social studies. (Video clips are free for 6 months upon registration. Starting with Comprehension Apr 23 2020 It is never too early to start comprehension instruction. In fact, reading begins with meaning making. Andie Cunningham and Ruth Shagoury designed a reading program for five- and six-year-olds based on this premise. Most of the students in Andie's Portland, Oregon, kindergarten class have little or no alphabet knowledge when they enter the classroom in the fall. English is a second--or third--language for many of the children in this low-income neighborhood. Through research-based principles, carefully structured routines, and innovative activities, even the youngest learners can develop comprehension skills from their first days in school. The children in *Starting with Comprehension* are grappling with school culture for the first time and learning to work with classmates who speak a variety of different languages. These emergent readers learn to present their understanding of what they read through writing, talk, movement, and art. Kindergartners and preschoolers are different from readers who know how to decode texts. Andie and Ruth show how comprehension skills can be nurtured and strengthened even before decoding begins. In this classroom, meaning making becomes part of community building as children link reading, thinking, and communicating.

Comprehension [Grades K-12] Feb 02 2021 Radically change the way students learn from texts, extending beyond comprehension to critical reasoning and problem solving. Is your reading comprehension instruction just a pile of strategies? There is no evidence that teaching one strategy at a time, especially with pieces of text that require that readers use a variety of strategies to successfully negotiate meaning, is effective. And how can we extend comprehension beyond simple meaning? Bestselling authors Douglas Fisher, Nancy Frey, and Nicole Law propose a new, comprehensive model of reading instruction that goes beyond teaching skills to fostering engagement and motivation. Using a structured, three-pronged approach—skill, will, and thrill—students learn to experience reading as a purposeful act and embrace struggle as a natural part of the reading process. Instruction occurs in three phases: Skill. Holistically developing skills and strategies necessary for students to comprehend text, such as monitoring, predicting, summarizing, questioning, and inferring. Will. Creating the mindsets, motivations, and habits, including goal setting and choice, necessary for students to engage fully with texts. Thrill. Fostering the thrill of comprehension, so that students share their thinking with others or use their knowledge for something else. Comprehension is the structured framework you need to empower students to comprehend text and take action in the world.
