This volume presents 1,592 letters, 668 of them previously unpublished, years 1850 to 1852. This was a time of great activity for Dickens, who continued the serial publication of David Copperfield, began work on Bleak House, successfully established the weekly Household Words (in which his own serial Child's History of England appeared), and wrote about 100 articles and stories for the journal, including many uncollected pieces. In April 1851 he and Sir Edward Bulwer Lytton founded the Guild of Literature and Art, a scheme to help writers and artists. He also suffered a number of personal blows: the death of his father, his baby daughter Dora, and two of his close friends, Richard Whately and Alfred D'Orsay; there was also anxiety over the illness of his wife Catharine.

This book offers an original and exciting analysis of the concept of the criminal underworld. Print culture, policing and law enforcement, criminal networks, space and territory are explored here through a series of case studies taken from the eighteenth, nineteenth and twentieth centuries. This analysis of British policy during the last years of the Great War argues that it was strongly influenced by a mood of pessimism. The policy was revised after the defeats suffered by allies in 1917, so much so that Britain almost "tumbled into peace" the following year.

Investigations: 150 Things You Should Know, Second Edition, explores essential tips and techniques for security investigations, providing a useful reference for those at any stage of their security career. This practical guide covers the legal guidelines that all investigators must follow. Through anecdotal case studies and documented procedures, the authors present the most complete collection of investigative information available. Readers in the security and law enforcement fields will find this book easy to use and understand when seeking explanations about a wide variety of investigative topics, including constitutional law, documentary evidence, surveillance equipment, interviewing, interrogation and reporting. Offers a comprehensive overview of security investigations. Provides simple practical tips for busy security professionals. Blends theory with practice with specific focus on today's global business and social environment. Provides legal guidelines that must be followed for proper private security investigations.

The definitive reference work on clinical trials, this book presents a wealth of detailed, practical information on the design, conduct, and analysis of both single center and multicenter trials. No other book on clinical trials offers much detail as Meinert does on such issues as sample size calculation, stratification and randomization, data systems design, consent form development, publication policies, preparation of funding requests, and reporting procedures.

TRR no. 2021 includes 14 papers that explore intrahousehold interaction analysis, agent-oriented coupling of activity-based demand generation with multiagent traffic simulation, modeling adults' weekend day-time use, human interaction spaces under uncertainty, and analysis of children's daily time-use and activity patterns. This issue of the TRR also examines a stated adaptation survey of activity rescheduling; recurrence of daily travel patterns; interaction between residential relocations, life course events, and daily commute distance; capturing human activity spaces; identifying skeletal information of activity patterns; successfully changing individual travel behavior; mobility management in Japan; who chooses to carpool and why; and commuter parking versus transit-oriented development. "Report of the Dominion fishery commission on the

fisheries of the province of Ontario, 1893", issued as an addendum to vol. 7. "Report of the Dominion fishery commission on the fisheries of the province of Ontario, 1893", issued as vol. 26, no. 7, supplement. Analyzes the person and achievements of Curzon, viceroy of India under Queen Victoria and later foreign secretary under King George V, discussing his childhood, friendships, affairs, and political career. Singapore remains one of the few countries in the region that has yet to decriminalize homosexuality. Yet it has also been hailed by some as one of the emerging gay capitals of Asia. This book accounts for the rise of mediated queer cultures in Singapore's current milieu of illiberal citizenship. This collection analyses how contemporary queer Singapore has emerged against a contradictory backdrop of sexual repression and cultural liberalisation. Using the innovative framework of illiberal pragmatism, established and emergent scholars and activists provide expansive coverage of the impact of homosexuality on Singapore's media cultures and political economy, including law, religion, military, literature, theatre, photography, cinema, social media and queer commerce. It shows how new LGBT subjectivities have been fashioned through the governance of illiberal pragmatism, how pragmatism is appropriated as a form of social and critical democratic action, and how cultural citizenship is forged through a logic of queer complicity that complicates the flows of oppositional resistance and grassroots appropriation. This book explores civil-military relations in Asia. With chapters on individual countries in the region, it provides a comprehensive account of the range of contemporary practices under conditions of abridged democracy, soft authoritarianism or complete totalitarianism. Through its analysis, the book argues that civil-military relations in Asia ought to be examined under the concept of 'Asian military evolutions'. It demonstrates that while Asian militaries have tried to incorporate standard, Western-derived frameworks of civil-military relations, it has been necessary to adapt such frameworks to suit local circumstances. The book shows how this has in turn led to creative fusions and novel changes in making civil-military relations an asset to furthering national security objectives. Supplement to the Federal Register, containing a codification of documents of general applicability and future effect ... with ancillaries. A Historical Introduction to Mathematical Modeling of Infectious Diseases: Seminal Papers in Epidemiology offers step-by-step help on how to navigate the important historical papers on this subject, beginning in the 18th century. The book carefully, and critically, guides the reader through seminal writings that helped revolutionize the field. With pointed questions, prompts, and analysis, this book helps the non-mathematician

develop their own perspective, relying purely on a basic knowledge of algebra, calculus, and statistics. By learning from the important moments in the field from its conception to the 21st century, it enables readers to mature into competent practitioners of epidemiologic modeling. Presents a refreshing and in-depth look at key historical works of mathematical epidemiology. Provides a basic knowledge of mathematics readers need in order to understand the fundamentals of mathematical modeling of infectious diseases. Includes questions, prompts, and answers to help apply historical solutions to modeling problems.

Complex systems is a new field of science studying how parts of a system give rise to the collective behaviors of the system, and how the system interacts with its environment. This book examines the complex systems in environmental sustainability, and examines the technologies involved to help mitigate human impacts, such as renewable energy, desalination, carbon capture, recycling, etc. It considers the relationships and balance between environmental engineering and science, economics, and human activity, with regard to sustainability.

When Missouri became the twenty-fourth state in the Union in 1821, it was already heir to a rich and varied historical legacy. From 1673 to the Louisiana Purchase, Europeans of different nationalities, assisted by the Africans they brought with them, competed alternately with Indians and against themselves for control of the land. But while land and resources were the focus of the struggle, the region's cultural identity was being determined by the mingling and clashing of diverse cultures -- Indian, French, African, Spanish, and Anglo-American. The story of the blending of those diverse cultures in a land rich in resources and beauty is an extraordinary tale. Especially appealing to many readers will be the attention Foley gives to common Missourians, the status of women and Blacks, and to Indian-White relations. In this account, pioneer hunters, trappers, and traders who roamed the Ozark hills and the boatmen who traded on the Missouri and Mississippi rivers take their place beside the small coterie of prominent St. Louisians whose wealth and influence enabled them to dominate the region politically and economically. - Back cover

Technological innovations are altering the traditional value chain in securities trading. Hitherto the order handling, i.e. the appropriate implementation of a general trading decision into particular orders, has been a core competence of brokers. Labeled as Algorithmic Trading, the automation of this task recently found its way both into the brokers' portfolio of service offerings as well as into their customers' trading desks. The software performing the order handling thereby constantly monitors the market(s) in real-time and further evaluates

historical data to dynamically determine appropriate points in time for trade. Within only a few years, this technology propagated itself among market participants along the entire value chain and has nowadays gained a significant market share on securities markets worldwide. Surprisingly, there has been little research analyzing the impact of this special type of trading on markets. Markus Gsell's book aims at closing this gap by analyzing the drivers for adoption of this technology, the impact the application of this technology has on markets on a macro level, i.e. how the market outcome is affected, as well as on a micro level, i.e. how the exhibited trading behavior of these automated traders differs from normal traders' behavior. "Report of the Dominion fishery commission on the fisheries of the province of Ontario, 1893", issued as volume no. 7, supplement.
