It uses 3D mapping and other technology to create a curved screen which seems to sit in the palm of the hand. This seems to be a new technology from Apple to solve the problem of not being able to fit the entire screen in the bezel. One of the cool things they have is the ability to put a video into a reverse video so you can see the camera lens when taking photos. This will be good for when it comes that you are having a night time engagement shoot and the lighting in the room isn't good enough. It also has a feature called Face ID. The feature will automatically identify who the person is and will unlock the phone so the person doesn't have to unlock the phone with their passcode. The device comes with a 120Hz refresh rate. The phone uses Apple's Neural engine, 3.0 GHz Apple A13 Bionic Processor, A16 3D stacked GPU, 6GB RAM, 128/256GB storage options, Face ID, 5.8" Apple OLED display, 19.5:9, 5.85" Super Retina Display, 12MP wide-angle camera, f1.8, 12MP normal camera, f2.0, 12MP front camera, Dual SIM model, Wi-Fi / GPS, Bluetooth / NFC / 3D Touch, 4G LTE, IP68 water and dust resistance.
