From Dissertation to Book Mar 03 2021 All new Phd's hope that their dissertations can become books. But a dissertation is written for a committee and a book for the larger world. William Germano's *From Dissertation to Book* is the essential guide for academic writers who want to revise a doctoral thesis for publication. The author of *Getting It Published*, Germano draws upon his extensive experience in academic publishing to provide writers with a state-of-the-art view of how to turn a dissertation into a manuscript that publishers will notice. Acknowledging first that not all theses can become books, Germano shows how some dissertations might have a better life as one or more journal articles or as chapters in a newly conceived book. But even dissertations strong enough to be published as books first need to become book manuscripts, and at the heart of *From Dissertation to Book* is the idea that revising the dissertation is a fundamental process of adapting from one genre of writing to another. Germano offers clear guidance on how to do just this. Writers will find advice on such topics as rethinking the table of contents, taming runaway footnotes, shaping chapter length, and confronting the limitations of jargon, alongside helpful timetables for light or heavy revision. With crisp directives, engaging examples, and a sympathetic eye for the foibles of academic writing, *From Dissertation to Book* reveals to recent PhD's the process of careful and thoughtful revision—a truly invaluable skill as they grow into their new roles as professional writers.

**The Slant Book** Feb 14 2022 Watch out! A little boy comes rushing down a hill, through busy streets, a pasture, a tennis yard and a meadow — before finally coming to rest, safely in a haystack. Peter Newell's own hilarious, topsy-turvy

illustrations fill the pages of the classic "The Slant Book", which was one of the earliest 'picture books'. This first edition from 1910 is guaranteed to still entertain both young and old. Peter Newell (1862-1924) was an American artist, author and illustrator of children's books. Creating his own picture books, such as "The Hole Book" and "The Slant Book", he also illustrated first editions of books by authors such as Mark Twain, Stephen Crane, John Kendrick Bangs, and Lewis Carroll.

Caring for Words in a Culture of Lies, 2nd ed Oct 22 2022 With the pervasiveness of vitriol and dishonesty today, language needs to be revived and restored. In Caring for Words in a Culture of Lies, Marilyn McEntyre exposes the commercial and political forces that affect public discourse in American culture and counters with twelve constructive "strategies of stewardship"—such as challenging lies (including widely tolerated forms of deception and spin), fostering the art of conversation, and encouraging playfulness and prayerfulness in writing and speaking. The second edition of this timely and timeless book includes updated cultural references and questions for reflection and discussion at the end, allowing a new generation of readers to apply McEntyre's wisdom in a world that struggles with truth and graceful language more than ever before.

**Writing True** Feb 20 2020 This book shows writers of all ages how to find and develop nonfiction topics that matter to them in ways that make readers care too. It emphasizes writing for discovery, not just writing what one knows. It emphasizes a strong authorial presence (voice) and a convincing point of view. Most important, it not only tells but also shows how writing true involves the poet's attention to language, the fiction writer's power of storytelling, the journalist's pursuit of fact, and the scholar's reliance on research. The first part of the book offers ten practical chapters from getting started to turning first ideas into finished work. Topics include: The Power of the Notebook, Ten Ways to a Draft, Taking Shape, Finding Voice, Twenty Ways to Talk About Writing, The Craft of Revision, The Role of Research, The Ethics of Creative Nonfiction, Workshopping a Draft, and Exploring New Media. The second part of the book is an anthology of the best nonfiction writing for aspiring writers to read and study in order to write with creativity, integrity, and authenticity. Organized by form, they include Memoir, Personal Essay, Portrait, Essay of Place, Narrative Journalism, and Short Shorts. Selections represent a variety of experience from classic masters (E.B.White and George

Orwell) to major contemporary writers (such as Alice Walker, Stephen Dunn, and Scott Russell Sanders) to up and coming writers (such as E.J. Levy and Amy Butcher). The anthology also includes "Stories of Craft," with five prominent writers, including Patricia Hampl and Sue Miller, describing the challenges and rewards of writing engaging nonfiction.

Both standard and new results are presented. A "Technical Index" indicates the mathematical level — from zero to PhD — for each chapter. The finance in each chapter is self-contained. Real-life comments on "life as a quant" are included. An errata and Additions (3rd Reprint, 2008) to the book is available.

**The Memory Trace (PLE: Memory)** Sep 09 2021 There was some agreement about what memory traces were not, but little about what actually did characterize the memory trace. Yet models and theories of memory at the time could not help making implicit and often unrecognized assumptions about the memory trace. Originally published in 1982, this title aimed to strengthen the meagre base on which memory theories rested at the time. It challenges old assumptions and introduces new concepts, foremost the notion of singularity, as they become necessary to understand traces adequately. Some research data of the past was found in need of reinterpretation. The result is a new theory of the memory trace.

**The Creative Qualitative Researcher** Feb 02 2021 The Creative Qualitative Researcher is designed to help readers see the range of possibilities of creative scholarship. The phrase "creative qualitative researchers" points toward scholars who call upon their literary skills to evoke the emotional and intellectual complexity of their subjects; who deploy their vulnerable, relational, and reflexive selves to expose and change problematic cultural practices; and who engage their embodied ideological and ethical sensibilities as researchers. Part I introduces chapters on four qualitative methods: autoethnography, performative writing, narrative inquiry and poetic inquiry. Each of these four method chapters presents the method written in the style it features, provides writing prompts for exploring the chapter's themes, and offers written examples of the method. Part II, divided into four chapters, aims to develop creative qualitative research skills relevant to the methods discussed in Part I. Chapter 5 discusses empathy and ethics; Chapter 6 is a primer on creative writing; Chapter 7 identifies some alternative ideas for using the words of others; and Chapter 8 focuses on collaborative improvisation to compose scholarly work. Each of the chapters in Part II includes a large number of writing exercises, prompts and strategies to assist scholars in becoming better creative researchers. By the end of the book, readers will know what creative research might entail and will have a clear understanding of the methods. Working with the various writing strategies, readers will see the potential of creative research and gain skills for its use.

*Slant* Jul 27 2020 The "reigning master of hard-edge science fiction takes a chilling look at the plausible near-future" in this cyberpunk sequel to *Queen of Angels* (Seattle Post-Intelligencer). In the second half of the twenty-first century,

nanotechnology has transformed every aspect of society. Humans can now change their abilities, their appearance, their very bodies on microscopic level. Advanced psychotherapy seems to have wiped away violence and illness. The world is sane and in balance. However, that balance teeters with the grisly murder of two prostitutes and a series of suicides. Soon, public defender Mary Cho's investigation finds a dark danger lurking in the recesses of the "dataflow." Entertainment, virtual pornography, neo-Luddite separatists, an unknown artificial intelligence—everything seems to be intertwined in a vast conspiracy. As technology fails so too does the society perched high atop it. Perfection is a high pedestal from which to fall.
