This is a practical guide to building a secure enterprise infrastructure with J2SE and J2EE technologies. This text explains how J2SE and J2EE security architectures relate to each other, and also covers the security aspects of servlets, JSP and EJB. The management field increasingly recognizes that most firms in the world are family firms and that these entities operate differently from the non-family firms on which most of our current management theories are based. The De Gruyter Handbook of Business Families brings together work from leading academics who explore emerging research themes relevant to business families, particularly drawing in new insights from adjacent disciplines that can advance the family business field. The handbook challenges the traditional notion of the "single firm–single family" that has characterized most early research on family business. Recognizing that families may simultaneously own or control multiple businesses as well as substantial wealth beyond these firms in the form of financial and non-financial assets, this handbook focuses on business families rather than the narrower construct of family business. The contributions in this handbook explore the relatively neglected dynamics between individuals with family ties that shape the interaction between family and business; business families with multiple businesses; how business families adopt formal rules and processes around their joint activities; and the institutionalization of wealth and business families in society. The De Gruyter Handbook of Business Families fills a gap in the family business research literature and is an essential reference work for researchers and graduate-level students in the area of business families. "This book is to provide comprehensive coverage and understanding of various enterprise information systems (EIS) such as enterprise resource planning (ERP) and electronic commerce (EC) and their implications on supply chain management and organizational competitiveness"--Provided by publisher. For software development companies, deciding which development methodology to use when starting a project is in many cases an important task to perform. The selection of development methodology can be modeled as a decision-making problem. Neutrosophy is a philosophical current that starts from Paradoxism. In this article, we describe a methodology selection proposal using neutrosophic numbers, from which the development methodology proposal is decided. The method allows taking into account the indeterminacy in decision-making, in addition to the use of linguistic terms that are more appropriate than numerical ones. The applicability of the proposal is confirmed through a demonstrative example. The paper ends with the conclusions and recommendations for future work. Das Forum Bauinformatik steht unter dem Motto „von jungen Forschenden für junge Forschende“. Es bietet jungen Wissenschaftlerinnen und Wissenschaftlern sowie interessierten Studierenden die Möglichkeit, ihre Forschungsarbeiten zu präsentieren, Problemstellungen fachspezifisch zu

diskutieren und sich ganz allgemein über den neusten Stand der Forschung zu informieren. Zudem ergibt sich dadurch eine ausgezeichnete Gelegenheit, in die wissenschaftliche Gemeinschaft im Bereich der Bauinformatik einzusteigen und Kontakte zu anderen Forschenden zu knüpfen. According to the motto “from young researchers for young researchers” the Forum Bauinformatik offers researchers as well as interested undergraduates the opportunity to present their research work, to discuss discipline-specific problems and to catch up to the current state in research. Furthermore, it gives an excellent chance to get in touch with the scientific community in the field of Computing in Civil Engineering and socialize with other researchers This is one of the few books on the market dealing with offshoring of professional services, a dynamic phenomenon of high relevance in the global economy. The market for offshore services is worth more than 1 trillion dollars annually and employs millions of people. Global offshoring of services has been recently undergoing a profound transformation due to automation and robotisation of tasks. It can be associated with the increased codification of knowledge, commoditisation of services and advancement in technology. The global perspective has been supplemented by a detailed analysis of offshoring in Central and Eastern Europe. It witnesses a dynamic growth of foreign direct investment (FDI) in professional services, resulting in capital and knowledge transfers. This book is a result of a holistic approach and an interdisciplinary research. It is enriched with conclusions from meetings with representatives of: authorities responsible for attracting FDI; associations of offshoring firms; and enterprises operating in professional services. It was also a result of numerous discussions with scholars during academic conferences and research seminars. Accurate, up-to-date foreign tax rates and key tax facts for 47 countries from Argentina to Venezuela. Authors Paul Polak and Mal Warwick describe their Zero-Based Design of starting from scratch to create innovative products and services tailored for the very poor to show how their design principles and vision can enable unapologetic capitalists to supply the very poor with clean drinking water, electricity, irrigation, housing, education, health care, and other necessities at a fraction of the usual cost and at profit margins attractive to investors. For more than 40 years, Computerworld has been the leading source of technology news and information for IT influencers worldwide. Computerworld's award-winning Web site (Computerworld.com), twice-monthly publication, focused conference series and custom research form the hub of the world's largest global IT media network. Oil and coal have built our civilisation, created our wealth and enriched the lives of billions. Yet their rising costs to our security, economy, health and environment are starting to outweigh their benefits. Moreover, the tipping point where alternatives work better and compete purely on cost is not decades in the future - it is here and now. And that tipping point has become the fulcrum of economic transformation. In Reinventing Fire, Amory Lovins and the Rocky Mountain Institute offer a new vision to revitalise business models and win the clean energy race - not forced by public policy but led by business for long-term advantage. This independent and rigorous account offers market-based solutions

integrating transportation, buildings, industry and electricity. It maps pathways for running a 158%-bigger US economy in 2050 but needing no oil, no coal, no nuclear energy, one-third less natural gas and no new inventions. This transition would cost \$5 trillion less than business-as-usual - without counting fossil fuels' huge hidden costs. Whether you care most about profits and jobs, or national security, or environmental stewardship, climate, and health, Reinventing Fire makes sense. It's a story of astounding opportunities for creating the new energy era. -- Publisher description. Covers receipts and expenditures of appropriations and other funds. This edited book aims to ignite both an academic and practitioner-oriented discussion regarding the question how the business and government sector can adapt to today's fast-changing climate. Specifically, the collection seeks to explore how businesses and policy makers can prepare for a world where freshwater is scarce, extreme weather events are common, floods and wildfires are frequent, and global sea levels rise by more than two meters. In addition to assessing incremental approaches, it explores strategies that employ interdisciplinary and innovative solutions to climate change adaptation. The chapters included in this book examine and propose business and policy solutions for climate-induced economic, technical, urban, and societal challenges. It draws on an international range of prominent authors and, therefore, will be of interest for academics and practitioners working in the field of sustainability management, sustainable finance, sustainable operations management, food management, strategy, and environmental management. It can also serve as a valuable guide for practitioners and policymakers in those fields.

Diplomarbeit aus dem Jahr 2006 im Fachbereich BWL - Marketing, Unternehmenskommunikation, CRM, Marktforschung, Social Media, Note: 2,0, Fachhochschule Kiel, 30 Quellen im Literaturverzeichnis, Sprache: Deutsch, Abstract: Die heutige Zeit, die von immer stärker werdendem Kostendruck geprägt ist, verlangt von Unternehmen die ständige Reduzierung der Prozesskosten. Mobile Business Solutions (MBS), der Begriff wird in Kapitel 2.1.1. definiert, sind eine Möglichkeit, die Prozesskosten zu senken. Der Konsumentenmarkt ist durchaus bereit, mobile Lösungen anzunehmen, wofür die starke Verbreitung von Notebooks und Mobiltelefonen spricht, auch erhält das Thema Mobilität seit vielen Jahren starken Zuspruch und spätestens seit der breiten Einführung der Mobilfunkübertragungstechnik GPRS und leistungsfähigen Endgeräten stehen die notwendigen Technologien zur Verfügung. Trotzdem ist die Nachfrage nach Mobile Business Solutions bei deutschen Unternehmen sehr gering. Verglichen mit den deutschen Unternehmensinvestitionen in die IT-Infrastruktur sind die Investitionen in Mobile Business Solutions verschwindend gering, zieht man das Potenzial in Betracht. 1 Dabei sind sich deutsche Unternehmen des Potenzials von Mobile Business Solutions bewusst: nach einer Studie der Deutschen Gesellschaft für Managementforschung sehen 94% der deutschen Unternehmen die Möglichkeit, mit Hilfe von Mobile Business Solutions Wettbewerbsvorteile zu realisieren. 2 Der Mobile Business Solutions Markt entwickelt sich nach Ansicht von Experten langsamer als erwartet. 3 Durch MBS wird u.a. die Produktivität erhöht, bspw. dadurch, dass Mitarbeiter

während Wartezeiten geschäftskritische E-Mails bearbeiten können. Für den folgenden Business Case betrachtet der Autor den finanziellen Effekt von einem 1-prozentigen Produktivitätszuwachs der Mitarbeiter durch den Einsatz von Mobile Business Solutions: [...] This book is about IT architecture set against the background of the practical insights gained at HP (Hewlett-Packard) since 1986 and formalized in the HP methodology for IT Strategy and Architecture (ITSA). The important message is that architecture is used to solve problems or exploit opportunities and is not used for the sake of architecture. Core to this is the concept of a seamless chain of justification that unites stakeholders in defining, reinforcing, and supporting the single best fitting IT business solution. This book teaches the IT architecture practitioner how to align the different views and interests of these stakeholders into coherent IT architecture artifacts by permeating the business, functional, technical, and implementation perspectives. Due to the absence of due process and other procedural guarantees generally offered by judicial enforcement, informal debt collection practices (IDCPs) can become abusive, harming both consumers and the economy by threatening consumers' physical, psychological, and economic wellbeing; exposing lawabiding debt collectors to unfair competition; undermining the financial system; and negatively impacting social peace by resorting to criminal activity. The need to control and harmonize IDCPs surfaced in connection with the European Commission's Action Plan to tackle the high level of non-performing loans caused by the financial crisis and the Covid-19 pandemic –specifically the Proposal for a Directive on Credit Servicers, Credit Purchasers, and the Recovery of Collateral (CSD). Harmonizing the regulation of abusive IDCPs is vital for several reasons. First, IDCPs have a cross-border dimension due to the freedom of movement, enabling debt collection operations across the internal market. Second, the internal market's size amounts to over 450 million citizens potentially exposed to abusive IDCPs. The regulatory frameworks addressing IDCPs in the E.U. display divergent characteristics that may be difficult to navigate and require creating a level-playing field for consumers and debt collectors, especially when approaches vary at Member State level. This book addresses this gap by providing a comprehensive guide to regulating informal debt collection practices in eight Member States of the E.U. and the United Kingdom (U.K.). It serves as a comparative law instrument for implementing the recently adopted CSD. It will be important reading for students, academics, and stakeholders with an interest in debt collection practices and the law. Ending Global Poverty: The MicroFranchise Solution clearly explains the nature, cause, effects, and most effective solution to the most serious problem on the planet -- global poverty. So many books on solving poverty focus on big government and non-profit solutions. Many of these have failed. Poverty solutions need to drill down to those who need the help. Microfranchising is a viable solution, bringing small enterprise solutions to people in need. Shedding new light on the human side of big data through the lenses of emotional and social intelligence competencies, this book advances the understanding of the requirements of the different professions that deal with big data. It also illustrates

the empirical evidence collected through the application of the competency-based methodology to a sample of data scientists and data analysts, the two most in-demand big data jobs in the labor market. The book provides recommendations for the higher education system to offer better designed curricula for entry-level big data professions. It also offers managerial insights in describing how organizations and specifically HR practitioners can benefit from the competency-based approach to overcome the skill shortage that characterizes the demand for big data professional roles and to increase the effectiveness of the selection and recruiting processes. Businessmen and managers, consultancy clients, readers of the Goldratt novels, and workshop attendees often ask: What is this Theory of Constraints? How can it benefit me? How is it different from other management theories? Is there something I can read to quickly understand its fundamentals? This book is an answer to these questions. Using engaging language and offering many real-life examples, it provides an overview of the methods and tools of the Theory of Constraints: Drum-Buffer-Rope, Buffer Management, Throughput Accounting, Pull Distribution, Irresistible Offer, Corporate Strategy, and Viable Vision. You will learn how to recognize and use constraints, how to complete projects quickly and reliably, and how to gain a competitive lead and to turn it into profit. This latest year-long period of research on the Mexican economy was marked by a sense of reflection and reinvention in the business community. As the world continues to restructure itself in the wake of COVID-19 and the subsequent disruption to the global supply chain, players in the country are continuing to discover Mexico's role in this new reality. In this 246-page edition, which features interviews with top business leaders from across the economy, as well as news and analysis, we cover: green economy, finance, energy, mining, industry, mining and telecoms, logistics, security, construction, real estate, agriculture, health, education, tourism, and sports. "This book investigates the creation and implementation of enterprise information systems, covering a wide array of topics such as flow-shop scheduling, information systems outsourcing, ERP systems utilization, Dietz transaction methodology, and advanced planning systems"--Provided by publisher. • New York Times bestseller • The 100 most substantive solutions to reverse global warming, based on meticulous research by leading scientists and policymakers around the world "At this point in time, the Drawdown book is exactly what is needed; a credible, conservative solution-by-solution narrative that we can do it. Reading it is an effective inoculation against the widespread perception of doom that humanity cannot and will not solve the climate crisis. Reported by-effects include increased determination and a sense of grounded hope." —Per Espen Stoknes, Author, What We Think About When We Try Not To Think About Global Warming "There's been no real way for ordinary people to get an understanding of what they can do and what impact it can have. There remains no single, comprehensive, reliable compendium of carbon-reduction solutions across sectors. At least until now. . . . The public is hungry for this kind of practical wisdom." —David Roberts, Vox "This is the ideal environmental sciences textbook—only it is too interesting and inspiring to be called a

textbook.” —Peter Kareiva, Director of the Institute of the Environment and Sustainability, UCLA In the face of widespread fear and apathy, an international coalition of researchers, professionals, and scientists have come together to offer a set of realistic and bold solutions to climate change. One hundred techniques and practices are described here—some are well known; some you may have never heard of. They range from clean energy to educating girls in lower-income countries to land use practices that pull carbon out of the air. The solutions exist, are economically viable, and communities throughout the world are currently enacting them with skill and determination. If deployed collectively on a global scale over the next thirty years, they represent a credible path forward, not just to slow the earth’s warming but to reach drawdown, that point in time when greenhouse gases in the atmosphere peak and begin to decline. These measures promise cascading benefits to human health, security, prosperity, and well-being—giving us every reason to see this planetary crisis as an opportunity to create a just and livable world.

Plunkett's Companion to the Almanac of American Employers is the perfect complement to the highly-regarded main volume of The Almanac of American Employers.
