**Hues Class 3, Semester 2** Dec 25 2022 1. An integrated semester series for Classes 1 to 5, comprising two semester books for each class. 2. The books are mapped to the National Curriculum Framework. 3. The series focus on developing the 21st century skills of critical thinking, creativity, communication and collaboration through reading texts that are value-centric, as well as activities, exercises and projects that develop life skills along with application and analytical thinking. 4. The subjects included in Classes 1 & 2 (Semester 1 and 2) are English, Mathematics, Environmental Studies (EVS) and General Knowledge 5. The subjects included in Classes 3 to 5 (Semester 1 and 2) are English, Mathematics, Science, Social Studies and General Knowledge

**Smart Economy in Smart Cities** Dec 01 2020 The present book highlights studies that show how smart cities promote urban economic development. The book surveys the state of the art of Smart City Economic Development through a literature survey. The book uses 13 in depth city research case studies in 10 countries such as the North America, Europe, Africa and Asia to explain how a smart economy changes the urban spatial system and vice versa. This book focuses on exploratory city studies in different countries, which investigate how urban spatial systems adapt to the specific needs of smart urban economy. The theory of smart city economic development is not yet entirely understood and applied in metropolitan regional plans. Smart urban economies are largely the result of the influence of ICT applications on all aspects of urban economy, which in turn changes the land-use system. It points out that the dynamics of smart city GDP creation takes 'different paths,' which need further empirical study, hypothesis testing and mathematical modelling. Although there are hypotheses on how smart cities generate wealth and social benefits for nations, there are no significant empirical studies available on how they generate urban economic development through urban spatial adaptation. This book with 13 cities research studies is one attempt to fill in the gap in knowledge base.

**Journeys-Sem-2** Jul 08 2021 Term book

**Smart Global Megacities** Jan 14 2022 This book, the second volume, highlights 7 out of a total of about 36 megacities in the World which by definition have 10 million inhabitants. The cities/chapters presented in this book are based on recent advance such as the wide use of ICT, IOT, e-Governance, e-Democracy, smart economy and flattening and acceleration of the world that

is taking place in recent times as reported by 3 times Pulitzer Prize Winner Thomas Friedman. It therefore departs from other ideologies where only a certain megacity qualifies for the title of smart global megacities while in reality every megacity can, and presents how smart global megacities can be created.

**A Tale of Mallu Love** Jan 02 2021 A heart rending love affair of a girl and a boy who meet as classmates, friends and later as the most purely loved humans on earth. The comrade boy realizes his destiny of life. The bond of god can't be torn by humans....

**Campus Plus 2022** Aug 29 2020 India, bounded by the majestic Himalayan ranges in the North and edged by an endless stretch of golden beaches, is the land of hoary tradition and cultural diversity. A vivid kaleidoscope of landscapes, glorious historical sites and royal cities, misty mountain hideaways, colourful people, rich civilizations and festivities craft India Incredible. Recent years have witnessed the educational scene, especially the higher education sector in the State undergoing a sea change in respect of quality, diversity and accessibility in tune with the global trends. Kerala's surge in the educational front is to be viewed in the backdrop of the country's great legacy in education. India has been a major seat of learning for thousands of years. The country was home to Takshashila, the first university in the world and Aryabhama, the inventor of the digit Zero. In fact, education in Kerala has now become more value-added and affordable, thanks to the proactive initiatives of the State Government and the active involvement of the private sector. Moreover, in the higher education market, Kerala has a significant edge in respect of cost which means that there would be a growing influx of candidates into the state from outside the state for better and affordable professional education in the days to come. With the most sought-after professionals and an excellent network of institutes, Kerala is becoming the very preferred educational destination in the world. And, we are equipped for you with some elucidations which step-up her significance on the educational map. In Campus Plus, we propose some valuable information along with a number of educational institutes in the State which will be useful for the students and parents in the higher education scenario.

**Neuro-Systemic Applications in Learning** Oct 31 2020 Neuroscience research deals with the physiology, biochemistry, anatomy and molecular biology of neurons and neural circuits and especially their association with behavior and learning. Of late, neuroscience research is playing a pivotal role in industry, science writing, government program management, science advocacy, and education. In the process of learning as experiencing knowledge, the human brain plays a vital role as the central governing system to map the images of learning in the human brain which may be called educational neuroscience. It provides means to develop a common language and bridge the gulf between educators, psychologists and neuroscientists. The emerging field of educational neuroscience presents opportunities as well as challenges for education, especially when it comes to assess the learning disorders and learning intentions of the students. The most effective learning involves recruiting multiple regions of the brain for the learning task. These regions are associated with such functions as memory, the various senses, volitional control, and higher levels of cognitive functioning. By considering biological factors, research has advanced the understanding of specific learning difficulties, such as dyslexia and dyscalculia. Likewise, neuroscience is uncovering why certain types of learning are more rewarding than others. Of late, a lot of research has gone in the field of neural networks and deep learning. It is worthwhile to consider these research areas in investigating the interplay between the human brain and human formal/natural learning. This book is intended to bring together the recent advances in

neuroscience research and their influence on the evolving learning systems with special emphasis on the evolution of a learner-centric framework in outcome based education by taking into cognizance the learning abilities and intentions of the learners.

**10 ½ Stories of our Times** Jun 07 2021 Two colleagues constantly chat about cricket, movies and women at work, much to the annoyance of The Mechanical Engineer. An astrologer has a

strange visitor one evening, who is in a tearing hurry to know his Tomorrow, Today. The friendship between two housemates is disrupted by An Old Friend, who reconnects after a long time over a social networking site. An ardent Dravidfan is ridiculed by his playmates for his classical batting technique, but is determined to earn their respect. A boy narrates the story of The Lucky Day to the police who have come home to interrogate him. All this and more in 10½ Stories of Our Times. Set against the backdrop of an increasingly liberated, empowered and connected world, these hard-hitting stories bring to light the shifting paradigms of modern India, eager to break free from the warp of established conventions and traditional mindsets. The classic tales in this collection are full of drama and suspense. Peppered with humor and satire, the stories serve as a compelling commentary on the times we live in. Ten unique stories. Many interesting characters. Many shades of life... And, a half-a-story that will surely raise a few eyebrows.

*Zoology for Degree Students (For B.Sc. Hons. 3rd Semester, As per CBCS)* Mar 16 2022 This textbook has been designed to meet the needs of B.Sc. (Hons.) **Smart Metropolitan Regional Development** Sep 10 2021 This book discusses the concept and practice of a smart metropolitan region, and how smart cities promote healthy economic and spatial development. It highlights how smart metropolitan regional development can energize, reorganize and transform the legacy economy into a smart economy; how it can help embrace Information and Communications Technology (ICT); and how it can foster a shared economy. In addition, it outlines how the five pillars of the third industrial revolution can be achieved by smart communities. In addition, the book draws on 16 in-depth city case studies from ten countries to explore the state of the art regarding the smart economy in smart cities - and to apply the lessons learned to shape smart metropolitan economic and spatial development.

The Reincarnation May 06 2021 This is a simple life story with a critical explanation and evaluation of each of its aspects in depth. Most of us would certainly have thought about this question, 'what is the meaning and purpose of our life at some part of our life. Those were highly subjective without an answer. This would give a track for us to think about the solution to some unanswered questions around us. A gateway to explore those through some common lives.□

**Altogether Book 3 Semester 1** Oct 23 2022 Altogether 1-5 is a semester series consisting of a total of ten books (two semester books per class).
