The New York State Department of Education (NYSED) is not affiliated with Origins Publications and has not endorsed the contents of this book. Fourth grade is ground zero in the fierce debates about education reform in America. It's when kids (well, some of them) make the shift from "learning to read" to "reading to learn," and tomes have been written about the fourth-grade year by educators, administrators, philosophers, and pundits. Now, in a fascinating and

groundbreaking book, Inda Schaenen adds the voices of actual fourth-grade kids to the conversation. Schaenen, a journalist turned educator, spent a year traveling across the state of Missouri, the geographical and spiritual center of the country, visiting fourth-grade classrooms of every description: public, private, urban, rural, religious, charter. Speaking of Fourth Grade looks at how our different approaches to education stack up against one another and chronicles what kids at the heart of our great, democratic education experiment have to say about "What Makes a Good Teacher" and "What Makes a Good

Student,” as well as what they think about the Accelerated Reader programs that dominate public school classrooms, high-stakes testing, and the very purpose of school in the first place. A brilliant and original work at the intersection of oral history, sociology, and journalism, *Speaking of Fourth Grade* offers unique insight into the personal consequences of national education policy. The voices of the children in *Speaking of Fourth Grade* will stay with readers—parents, teachers, and others—for many years to come. In 1897, seventeen-year-olds Dacia and Lou, New York socialites and cousins, visit their maternal

homeland of Romania and learn the family secret--that they are shapeshifters, expected to take their rightful places and marry proper husbands. *Getting Ready for the 4th Grade Assessment Test: Help Improve Your Child’s Math and English Skills* - Many parents are expressing a demand for books that will help their children succeed and excel on the fourth grade assessment tests in math and English –especially in areas where children have limited access to computers. This book will help students practice basic math concepts, i.e., number sense and applications as well as more difficult math, such as patterns, functions, and algebra. English skills will

include practice in reading comprehension, writing, and vocabulary. Rubrics are included for self-evaluation. If your child is struggling with math, then this book is for you; the short book covers the topic and also contains 30 practice problems to work with. This subject comes from the book “*Fourth Grade Math (For Home School or Extra Practice)*”; it more thoroughly covers more fifth grade topics to help your child get a better understanding of fourth grade math. If you purchased that book, or plan to purchase that book, do not purchase this, as the problems are the same. Practice makes perfect! This large collection of fun and

engaging practice pages is designed to help students master essential skills in reading, writing, vocabulary, math, and more. With more than 300 skill-building practice pages, students are well on their way to succeed in school! Includes ready-to-use flash cards for extra skills practice. For use with Grade 4. They push first graders off the swings. And they never, ever cry. Suds knows that now that he's in fourth grade, he's supposed to be a rat. But whenever he tries to act like one, something goes wrong. Can Suds's friend Joey teach him to toughen up...or will Suds remain a fourth grade wimp? A result of an investigative report by tenacious University of Oregon journalism students, Classroom 15 tells the story of how the dreams of fourth-grade

students at the Riverside School, Roseburg, in rural Oregon timber country, were crushed by the prevailing Red Scare, McCarthyism, state and societal censorship, and J. Edgar Hoover's FBI. The teacher of Classroom 15, known fondly as Mr. McFetridge, assigned a pen pal project in an effort to take geography lessons outside of the classroom. Imagining a place as far from Oregon as they possibly could, the students wrote letters to nine- and ten-year-old counterparts in the Soviet Union. Janice Boyle, the class secretary, reached out to Oregon's Congressional representative, Charles O. Porter, seeking

assistance connecting with peers in Russia. Representative Porter forwarded the letter to the Secretary of State Christian Herter, and a week later the students received the shocking and disheartening news that their benign request had been needlessly denied. In the wake of McCarthyism, the Eisenhower administration subverted the assignment, fearing Communist propaganda would infect the innocent minds of eager Oregon schoolchildren. The students' plight quickly gained national attention with stories running from the Roseburg News-Review to the New York Times. The publicity didn't miss the attention of J. Edgar Hoover's

FBI. His agents investigated. They traveled to Roseburg, collected evidence, and took it back to the Bureau's regional headquarters in Portland. The public reaction was swift and unrelenting. The teacher and the Congressman were attacked by outraged Roseburg citizens, the school board, and enraged Americans across the country. Classroom 15 is all the above and a page-turning adventure story told with the voices of the empowered, tenacious University of Oregon journalism students who took the nascent story and demonstrated their unwavering devotion to the journalistic process by telling the tale.
