Helps researchers develop new catalysts for sustainable fuel and chemical production
Reviewing the latest developments in the field, this book explores the in-situ characterization of heterogeneous catalysts, enabling readers to take full advantage of the sophisticated techniques used to study heterogeneous catalysts and reaction mechanisms. In using these techniques, readers can learn to improve the selectivity and the performance of catalysts and how to prepare catalysts as efficiently as possible, with minimum waste. In-situ Characterization of Heterogeneous Catalysts features contributions from leading experts in the field of catalysis. It begins with an introduction to the fundamentals and then covers: Characterization of electronic and structural properties of catalysts using X-ray absorption fine structure spectroscopy
Techniques for structural characterization based on X-ray diffraction, neutron scattering, and pair distribution function analysis
Microscopy and morphological studies
Techniques for studying the interaction of adsorbates with catalyst surfaces, including infrared spectroscopy, Raman spectroscopy, EPR, and moderate pressure XPS
Integration of techniques that provide information on the structural properties of catalysts with techniques that facilitate the study of surface reactions
Throughout the book, detailed examples illustrate how techniques for studying catalysts and reaction mechanisms can be applied to solve a broad range of problems in heterogeneous catalysis. Detailed figures help readers better understand how and why the techniques discussed in the book work. At the end of each chapter, an extensive set of references leads to the primary literature in the field. By explaining step by step modern techniques for the in-situ characterization of heterogeneous catalysts, this book enables chemical scientists and engineers to better understand catalyst behavior and design new catalysts for green, sustainable fuel and chemical production.

Disappointment River is a historical narrative and travel memoir that at once transports readers back to the heroic age of North American exploration and places them in a still rugged but increasingly fragile Arctic wilderness in the process of profound change. Fourteen years before Lewis and Clark, Mackenzie set off to cross the continent of North America with a team of voyageurs and Chipewyan guides in an attempt to find a trade route to the riches of the East. What he found was a river that he named "Disappointment." Mackenzie died thinking he had failed. He was wrong. In this book, Brian Castner not only retells the story of Mackenzie's epic voyages in vivid prose, he personally retraces his travels, battling exhaustion, exposure, mosquitoes, white-water rapids and the threat of bears. He transports readers to a world rarely glimpsed in the media, of tar sands, thawing permafrost, remote indigenous villages and, at the end, a wide-open Arctic Ocean that could become a far-northern Mississippi of barges and pipelines and oil money. What he reveals is a world that Alexander Mackenzie dreamed of but could never have fully imagined. Introduces the world of Roshar through the experiences of a war-weary royal compelled by visions, a highborn youth condemned to military slavery, and a woman who is desperate to save her impoverished house. "Gripping and meticulously documented."—Don Schanche Jr., Washington Post Forsyth County, Georgia, at the turn of the twentieth century, was home to a large African American community that included ministers and teachers, farmers and field hands, tradesmen, servants, and children. But then in September of 1912, three young black laborers were accused of raping and murdering a white girl. One man was dragged from a jail cell and lynched on the town square, two teenagers were hung after a one-day trial, and soon bands of white "night riders" launched a coordinated campaign of arson and terror, driving all 1,098 black citizens out of the county. The charred ruins of homes and churches disappeared into the weeds, until the people and places of black Forsyth were forgotten. National Book Award finalist Patrick Phillips tells Forsyth's tragic story in vivid detail and traces its long history of racial violence all the way back to antebellum Georgia. Recalling his own childhood in the 1970s and '80s, Phillips sheds light on the communal crimes of his hometown and the violent means by which locals kept Forsyth "all white" well into the 1990s. In precise, vivid prose, *Blood at the Root* delivers a "vital investigation of Forsyth's history, and of the process by which racial injustice is perpetuated in America" (Congressman John Lewis).
