Habits of Mind Across the Curriculum Jul 23 2022 Distinguished educators Arthur L. Costa and Bena Kallick present this collection of stories by educators around the world who have successfully implemented the habits in their day-to-day teaching in K-12 classrooms. The collective wisdom and experience of these thoughtful practitioners provide readers with insight into the transdisciplinary nature of the 16 Habits of Mind—intelligent behaviors that lead to success in school and the larger world—as well as model lessons and suggestions for weaving the habits into daily instruction in language arts, music, physical education, social studies, math, foreign language, and other content areas. Readers will come to understand that, far from an "add-on" to the curriculum, the habits are an essential element for helping students at all grade levels successfully deal with the challenges they face in school and beyond. As in all their books on the Habits of Mind, Costa and Kallick have a broad and worthwhile goal in mind. As they say in the concluding chapter of this volume, "If we want a future that is much more thoughtful, vastly more cooperative, greatly more compassionate, and a whole lot more loving, then we have to invent it. That future is in our homes, schools, and classrooms today. The Habits of Mind are the tools we all can use to invent our desired vision of the future."

Martin Scorsese: A Biography Mar 31 2023 Martin Scorsese's current position in the international film community is unrivaled, and his name has become synonymous with the highest standards of filmmaking excellence. He is widely considered America's best living film director, and his *Taxi Driver* and *Raging Bull* appear frequently on worldwide surveys of the best films of all time. Here, in the first biographical account of this artist's life, Vincent LoBrutto traces Scorsese's Italian-American heritage, his strict Catholic upbringing, the continuing role of religion in his life and art, his obsessive love of cinema history, and the powerful impact that the streets of New York City had on his personal life and his professional career. Meanwhile, the filmmaker's humble, soft-spoken public persona tells only part of the story, and LoBrutto will delve into the other side of a complex and often tortured personality. Scorsese's intense passion, his private relationships, his stormy marriages, and his battles with drugs and depression are all chronicled here, and, in many cases, for the first time. In addition, the book includes an interview with the director, as well as filmographies cataloging his work as a director, producer, actor, and presenter. As his Best Director award at the 2007 Oscars clearly demonstrated, Scorsese has become something like Hollywood royalty in recent years, finally enjoying the insider status and favor that eluded him for most of his career. But these recent developments aside, Scorsese is also notable as a distinctly American type of artist, one whose work-created in a medium largely controlled by commercialism and marketing-has always been unmistakably his own, and who thus remains a touchstone of artistic integrity in American cinema. In *Martin Scorsese: A Biography*, readers can examine not only the work of one of the form's genuine artists, but also the forces that have propelled the man behind it.

Builders of Ohio Dec 16 2021 Van Tine and Pierces "Builders of Ohio is composed of twenty-four essays that use biography to explore Ohio's history. Collectively, they provide a historical overview of the state's development from George Croghan's search for fame and fortune on the seventeenth-century frontier through Dave Thomas's more recent creation of a fast-food empire. Each chapter also addresses important events and transformations in the state's history such as: European settlement; Native American resistance; the creation of territorial and state governments; the development of the state's educational and economic institutions; the disruption created by the Civil War; the struggle of African Americans and women to participate in Ohio's public life; efforts to ameliorate the pernicious effects of industrialization; the negotiation of the state's role in a nation increasingly dominated by the federal government; or the ramifications of de-industrialization and rise of a service economy.

Licht - Raum Nov 02 2020 The goal of this book is to develop temporary light spaces that re-interpret the existing urban environment on a seasonal basis or over a cycle of several years. As a result, the city will literally appear in a new light. Strollers in the city streets will experience their familiar environment in a new way. Illuminated planes interlacing with planes made by linear fields of light beams will create immaterial material space experiences: still lifes of light within which one can move about and light choreographies that move barely noticeably, creating still lifes in motion. The discourse in this book starts with essays introducing aspects of light spaces and concludes with documents on light spaces by Wolfgang Ranz collected over a period of 30 years showing how these light spaces were regarded in the writings of contemporaries.

Papua New Guinea: 2014 Article IV Consultation-Staff Report; Press Release Dec 28 2022 This 2014 Article IV Consultation highlights that Papua New Guinea's economy is experiencing an important transition, as new liquefied natural gas (LNG) production and exports commence. With LNG production and exports now starting, resource sector growth is projected to surge in 2015, but spillovers to the rest of the economy may be more limited. Inflation has moderated from its peaks during the construction boom and is likely to remain reasonably low given the global outlook for commodity prices. The ongoing economic transition calls for adjustment of macroeconomic policies to safeguard macrofinancial stability.

Biosynthesis of Tetrapyrroles Feb 15 2022 The study of the structure and function of tetrapyrrolic compounds has excited the interests of organic chemists, biochemists, botanists and biologists for more than a hundred years. Scientific analysis began with the first descriptions of naturally occurring porphyrins, and progress was made towards understanding the structure of chlorophyll. This was followed by the use of newly available isotopes of carbon and nitrogen to investigate the formation of porphyrins in biological systems. Further discoveries led to the elucidation of the atoms in protoporphyrin IX, made possible by the application of physical methods, such as NMR spectroscopy and recombinant DNA technology. The present volume discusses many more exciting and unexpected developments which have been made in the field over the last ten to fifteen years. While not all questions have yet been answered, the forum is set for a great scope of further research in the study of tetrapyrroles. • Of interest to biochemists, organic chemists and plant scientists • The book focusses on the exciting and unexpected developments in the field of tetrapyrroles over the last ten years • It paves the way for future research in this area

Public, Private, Secret Sep 24 2022 Public, Private, Secret explores the roles that photography and video play in the crafting of identity, and the reconfiguration of social conventions that define our public and private selves. This collection of essays, interviews, and reflections assesses how our image-making and consumption patterns are embedded and implicated in a wider matrix of online behavior and social codes, which in turn give images a life of their own. Within this context, our visual creations and online activities blur and remove conventional separations between public and private (and sometimes secret) expression. The writings address the various disruptions, resistances, and subversions that artists propose to the limited versions of race, gender, sexuality, and autonomy that populate mainstream popular culture. They anticipate a future for our image-world rich with diversity and alterity, one that can be shaped and influenced by the agency of self-representation.
