Defending the City of God

Sep 28 2022 "A fresh and highly accessible history of the Holy Lands during the Middle Ages, revealing a rich and diverse culture and the fight to save Jerusalem from the Crusaders"--

The Northern Crusades May 05 2023 The 'Northern Crusades', inspired by the Pope's call for a Holy War, are less celebrated than those in the Middle East, but they were also more successful: vast new territories became and remain Christian, such as Finland, Estonia and Prussia. Newly revised in the light of the recent developments in Baltic and Northern medieval research, this authoritative overview provides a balanced and compelling account of a tumultuous era.

A Distant Mirror May 13 2021 A "marvelous history"* of medieval Europe, from the

bubonic plague and the Papal Schism to the Hundred Years' War, by the Pulitzer Prize-winning author of *The Guns of August* *Lawrence Wright, author of *The End of October*, in *The Wall Street Journal* The fourteenth century reflects two contradictory images: on the one hand, a glittering age of crusades, cathedrals, and chivalry; on the other, a world plunged into chaos and spiritual agony. In this revelatory work, Barbara W. Tuchman examines not only the great rhythms of history but the grain and texture of domestic life: what childhood was like; what marriage meant; how money, taxes, and war dominated the lives of serf, noble, and clergy alike. Granting her subjects their loyalties, treacheries, and guilty passions, Tuchman recreates the lives of proud cardinals, university scholars, grocers and clerks, saints and mystics, lawyers and mercenaries, and, dominating all, the knight—in all his valor and "furious follies," a "terrible worm in an iron cocoon."

Praise for *A Distant Mirror*
“Beautifully written, careful and thorough in its scholarship . . . What Ms. Tuchman does superbly is to tell how it was. . . . No one has ever done this better.”—The New York Review of Books “A beautiful, extraordinary book . . . Tuchman at the top of her powers . . . She has done nothing finer.”—The Wall Street Journal “Wise, witty, and wonderful . . . a great book, in a great historical tradition.”—Commentary

The Scandinavian Baltic Crusades 1100–1500 Feb 02 2023 Wielding their swords in the name of their faith, the crusaders originally set out to reclaim Jerusalem and its surrounding territory in the Middle East. Increasingly, however, Eastern Europe and the last remaining bastions of pagan Europe became the targets of their religious zeal. The era officially began in 1147, when the Saxons, Danes, and Poles, responding to Pope Eugene III's call, initiated a

crusade against the Wends of the Southern Baltic. This was followed by crusades against the Livonians, Estonians, Finns, Prussians, and Lithuanians. By the 13th century much of the responsibility for sustaining these crusades fell to the Teutonic Knights, a military order formed in the Holy Land in 1190. They were aided by the constant support of the Roman pontiff and by a steady flow of mercenaries from throughout Christendom. The subsequent Scandinavian campaigns laid the foundations of modern Baltic society by destroying pagan rural farming settlements, and establishing fortified Christian towns and major castles. As with the majority of crusades, the prospective acquisition of land and power was the one of the key driving forces behind these bloody military expeditions. This book reveals the colorful history of these Crusades when the soldiers of the Pope fought their way across Eastern Europe and inexorably changed the future of the continent.

Jerusalem in the North Aug 16 2021 'God wills it, God wills it' - this was the response to the sermon of Pope Urban II at Clermont in 1095, in which he exhorted his audience to take the cross and liberate Jerusalem. And his words spread, even to the remotest islands in the north of Christendom. For the first time since the mid-nineteenth century, historians have investigated Latin, Danish, German, and Russian source materials about the Danish Crusades in the Baltic region. This team of four Danish medievalists describe how the idea of crusading reached the North and how Scandinavia became involved in the Western European crusading movement. Crusading ideology inspired Danish wars for hundreds of years against the Wends, Prussians, Lithuanians, Estonians and other pagan peoples along the coasts of the Baltic Sea so that in the twelfth and thirteenth centuries Denmark became the dominant crusading power in the region: a Jerusalem in the North.

Indeed, crusading remained an important political reality in Denmark until the Lutheran Reformation in the early seventeenth century. Ane L. Bysted holds a Ph.D. from the University of Southern Denmark with a dissertation on the development of the crusade indulgence, and has written on crusade theology and preaching. Carsten Selch Jensen is Associate Professor in Church History at the University of Copenhagen. Has written on crusading history, especially in the Baltic Region as well as on holy and just war in the Middle Ages. Kurt Villads Jensen is Associate Professor in Medieval History at the University of Southern Denmark and chair of the Medieval Centre. He has written on Christian mission and crusades, especially in the Baltic region and Iberia. John H. Lind has written extensively on the Baltic crusades and on relations between Scandinavia, Finland and Russia from the Viking Age up to modern times. **The Kingdom of Cyprus and the Crusades, 1191-1374** Apr

23 2022 A contribution to the history of the Crusades in the Levant, this text is a scholarly study of medieval Cyprus. *Teutonic Knight* Oct 30 2022 Osprey's study of Teutonic Knights from 1190 to 1561. The Military Order of Teutonic Knights was one of the three most famous Crusading Orders; the others being the Templars and the Hospitallers. Like these two, the Teutonic Knights initially focused upon the preservation of the Crusader States in the Middle East. Wielding their swords in the name of their faith, the crusading knights set out to reclaim Jerusalem. Unlike the Templars they survived the crises of identity and purpose which followed the loss of the last Crusader mainland enclaves in the late thirteenth century and, like the Hospitallers, they managed to create a new purpose - and a new field of combat - for themselves. Whereas the Hospitallers focused their energies in the eastern Mediterranean battling against Muslim armies, the Teutonic

Knights shifted their efforts to the Baltic, to the so-called Northern Crusades against pagan Prussians and Lithuanians and, to a lesser extent, against Orthodox Christian Russia. As a result the Order of Teutonic Knights became a significant power, not only in the Baltic but in north-central Europe as a whole. Paradoxically, however, it was their fellow Catholic Christian Polish neighbours who became their most dangerous foes, breaking the Order's power in the mid-fifteenth century. The Teutonic Knights lingered on in what are now Estonia and Latvia for another century, but this was little more than a feeble afterglow. This title will examine this fascinating military and religious order in detail, revealing the colourful history of the crusades within Europe itself which inexorably changed the future of the continent.

The Race for Paradise Dec 20 2021 In 1099, when the first crusaders arrived triumphant and bloody before the walls of

Jerusalem, they carved out a Christian European presence in the Islamic world that remained for centuries, bolstered by subsequent waves of new crusades and pilgrimages. But how did medieval Muslims understand these events? What does an Islamic history of the Crusades look like? The answers may surprise you. In *The Race for Paradise*, we see medieval Muslims managing this new and long-lived Crusader threat not simply as victims or as victors, but as everything in-between, on all shores of the Muslim Mediterranean, from Spain to Syria. This is not just a straightforward tale of warriors and kings clashing in the Holy Land - of military confrontations and enigmatic heroes such as the great sultan Saladin. What emerges is a more complicated story of border-crossers and turncoats; of embassies and merchants; of scholars and spies, all of them seeking to manage this new threat from the barbarian fringes of their ordered world. When seen from the

perspective of medieval Muslims, the Crusades emerge as something altogether different from the high-flying rhetoric of the European chronicles: as a diplomatic chess-game to be mastered, a commercial opportunity to be seized, a cultural encounter shaping Muslim experiences of Europeans until the close of the Middle Ages - and, as so often happened, a political challenge to be exploited by ambitious rulers making canny use of the language of jihad. [The Everyday Crusade](#) Jul 27 2022 What is causing the American public to move more openly into alt-right terrain? What explains the uptick in anti-immigrant hysteria, isolationism, and an increasing willingness to support alternatives to democratic governance? *The Everyday Crusade* provides an answer. The book points to American Religious Exceptionalism (ARE), a widely held religious nationalist ideology steeped in myth about the nation's original purpose. The book opens with a comprehensive

synthesis of research on nationalism and religion in American public opinion. Making use of survey data spanning three different presidential administrations, it then develops a new theory of why Americans form extremist attitudes, based on religious exceptionalism myths. The book closes with an examination of what's next for an American public that confronts new global issues, alongside existing challenges to perceived cultural authority. Timely and enlightening, *The Everyday Crusade* offers a critical touchstone for better understanding American national identity and the exclusionary ideologies that have plagued the nation since its inception.

[True Myth](#) Dec 08 2020 Why is it that encyclopedias assert the Vikings, or Norsemen, landed in parts of North America, yet the Vikings have never been credited with its discovery? Historians bestow this honor on Christopher Columbus, who ventured here five hundred years after the Vikings, having

never set foot on the continent! *True Myth: Black Vikings of the Middle Ages* takes the reader where he or she has never been before. We have always been told that Vikings, or Norsemen, were tall, blond, white and blue-eyed and an image that has been presented to us in books and films. Now comes a book that challenges this centuries-old assertion, presenting evidence that these vaunted warriors were not the people popular historians have told us they were. The author presents evidence that white-skinned peoples in England, Ireland, and Wales referred to Vikings as black pagans and black devils. The extent of their dominance in Europe is examined in fact, the author presents a reassessment of Europe that some readers will find difficult to believe, beginning with mass migrations into the continent and examining a number of black-skinned peoples who called Europe home from very ancient times almost to the present. The reader has never read a book like this filled with

quotations from noted historians as well as from several Icelandic sagas that will take the reader on a journey he or she has never imagined! A more accurate picture of Europe has never been presented before. The writer revisits the last ice age, presents evidence of the heavy presence of blacks in ancient Europe, and revisits ancient Greece, Rome, and areas of Asia, discussing the presence of black-skinned peoples in them before arriving in Viking-age Scandinavia when Norsemen embarked on a three-century-long assault on the continent and began migrating to Iceland and other areas of North America. Once the reader has completed *True Myth: Black Vikings of the Middle Ages*, he or she will have to question what he or she has been taught, historians once thought to be trustworthy, and the notion that the races were strictly divided and had never intermingled. There has never been a truer picture of Europe written, and the reader now

has the opportunity to embark on the most thrilling journey he or she will ever take.

[The Clash of Cultures on the Medieval Baltic Frontier](#) Aug 28 2022 The conversion of the lands on the southern and eastern shores of the Baltic Sea by Germans, Danes and Swedes in the period from 1150 to 1400 represented the last great struggle between Christianity and paganism on the European continent, but for the indigenous peoples of Finland, Livonia, Prussia, Lithuania and Pomerania, it was also a period of wider cultural conflict and transformation. This collection explores the theme of clash of cultures from a variety of perspectives, discussing the nature and ideology of crusading in the medieval Baltic region, the struggle between Catholicism and Orthodoxy, and the cultural confrontation that accompanied the process of conversion.

The Northern Crusades Apr 04 2023

The Chronicle of Prussia by Nicolaus von Jeroschin Jun 13 2021 This is the first English translation of the 'Chronicle of Prussia', which was written by

Nicolaus von Jeroschin, in middle German verse, during the period from 1330 to 1341. It is a history of the Teutonic Knights, encompassing the period between the foundation of the order, in 1190, and 1331. The translator's introduction sets the work in its historical and cultural context. The text was written at the instigation of the Grand Master of the Teutonic Order, to make an account of the ethos and history of the order's conquest of Prussia available 'to all German people'. Its purpose was to remind the order's knight brothers and its supporters of its origins and past achievements, but above all it was intended to establish the legitimacy of Prussia as a locus for crusades, setting the scene for the order's 'golden age' in the second half of the fourteenth century. The chronicle's content is divided into three sections: it opens with a description of the founding of the order in Acre. There follows a discourse on the nature of spiritual and earthly warfare, which echoes

the ideology of crusading warfare first articulated by Bernhard of Clairvaux in his treatise *De laude novae militiae*. The final, longest, section recounts the wars of the Teutonic Knights against the Prussians and Lithuanians from 1230 until the narrative breaks off abruptly in 1331. The chronicle is the main historical source document for the period it covers and was widely disseminated during the fourteenth and fifteenth centuries. It is also an engaging and lively account of warfare and colonisation on the eastern frontier of Latin Christianity.

The Northern Crusades Jan 01 2023 The 'Northern Crusades', inspired by the Pope's call for a Holy War, are less celebrated than those in the Middle East, but they were also more successful: vast new territories became and remain Christian, such as Finland,

Crusades - Medieval Worlds in Conflict Feb 07 2021 These essays, selected from papers presented at the International Symposium on Crusade Studies in February 2006, represent a stimulating cross-section of this vibrant field. Organized under the rubric of "medieval worlds" the studies in this volume demonstrate the broad interdisciplinary spectrum of modern crusade studies, extending far beyond the battlefield into the conflict and occasional cooperation between the diverse cultures and faiths of the Mediterranean. Although the crusades were a product of medieval Europe, they provide a backdrop against which medieval worlds can be observed to come into both contact and collision. The range of studies in this volume

includes subjects such as Muslim and Christian understandings of their wars within their own intellectual and artistic perspectives, as well as the development of memory and definition of crusading in both the East and West. A section on the Crusades and the Byzantine world examines the intersection of western and eastern Christian attitudes and agendas and how they played out - particularly in the Aegean and Asia Minor. The book concludes with three studies on the crusader king, Louis IX, examining not only his two crusades in new ways, but also the role of the crusade in his later sanctification.

History of the Normans May 01 2020 The author's imagination is matched by his language, so presenting the unwary reader with difficulties, which the author notes and discusses throughout, defining and explaining the many poetic metres and prose embellishments used, and identifying the sources of numerous borrowings; he also

re-examines and collates the manuscripts and printed versions of the text, and considers the most recent scholarship in the field.

La Papauté et les croisades / The Papacy and the Crusades

Sep 04 2020 This volume brings together a selection of the papers on the theme of the Papacy and the Crusades, delivered at the 7th Congress of the Society for the Study of the Crusades and the Latin East. After the introduction by Michel Balard, the first papers examine aspects of crusader terminology. The next section deals with events and perceptions in the West, including papers on the crusades against the Albigensians and Frederick II, and on the situation in the Iberian peninsula. There follow studies on relations between crusaders and the local populations in the Byzantine world after 1204 and Frankish Greece, and in Cilician Armenia, while a final pair looks at papal interventions in Poland and Scandinavia.

The Last Years of the

Teutonic Knights May 25
2022 “The most comprehensive account available of the final years of the crusading military order” from the acclaimed author of *Medieval Mercenaries* (Baltische Historische Kommission). The Battle of Grunwald was one of the largest battles in Medieval Europe and was the most important in the histories of Poland and Lithuania. It was fought on 15 July 1410 during the Polish-Lithuania-Teutonic War between the alliance of the Kingdom of Poland (led by King Jagiello) and the Grand Duchy of Lithuania (led by Grand Duke Vytautas) against the German-Prussian Teutonic Knights (led by Grand Master Ulrich von Jungingen) and with the assistance of Sigismund, then King of Hungary and Croatia. The Teutonic Knights, a crusading military order, were defeated and most of their leaders were killed or taken prisoner. This defeat would mark the beginning of their decline and they would never again regain their former power. Following the battle,

the balance of power shifted in Central and Eastern Europe and so came the rise of the Polish-Lithuanian union as the dominant political and military force. In this compelling account the action takes place in Lithuania, Poland, the Czech Republic, Hungary, Russia and Germany. There are bloody battles; fascinating characters; intrigue; betrayals; sex; unexpected twists of fate; religious heresy and a smattering of saints. There is also the monumental end of one era making way for the beginning of another. While there has long been interest on the crusades outside of the Holy Land, this book is unique in the sheer breadth and depth of its research. “A must-read for those seeking scholarly work on this pivotal period of European history.” —*Journal of Military History*

The North-Eastern Frontiers of Medieval Europe Oct 06
2020 By the mid-twelfth century the lands on the eastern coast of the Baltic Sea, from Finland to the frontiers of Poland, were Catholic Europe’s

final frontier: a vast, undeveloped expanse of lowlands, forest and waters, inhabited by peoples belonging to the Finnic and Baltic language groups. In the course of the following three centuries, Finland, Estonia, Livonia and Prussia were incorporated into the Latin world through processes of conquest, Christianisation and settlement, and brought under the rule of Western monarchies and ecclesiastical institutions. Lithuania was left as the last pagan polity in Europe, yet able to accept Christianity on its own terms in 1386. The Western conquest of the Baltic lands advanced the frontier of Latin Christendom to that of the Russian Orthodox world, and had profound and long lasting effects on the institutions, society and culture of the region lasting into modern times. This volume presents 21 key studies (2 of them translated from German for the first time) on this crucial period in the development of North-Eastern Europe, dealing with crusade

and conversion, the establishment of Western rule, settlement and society, and the development of towns, trade and the economy. It includes a classified bibliography of the main works published in Western languages since World War II together with an introduction by the editor. The Barbarian Conversion Jan 27 2020 "An investigation of the process by which large parts of Europe accepted the Christian faith between the fourth and the fourteenth centuries and of some of the cultural consequences that flowed therefrom." In a work of splendid scholarship that reflects both a firm mastery of difficult sources and a keen intuition, one of Britain's foremost medievalists tells the story of the Christianization of Europe. It is a very large story, for conversion encompassed much more than religious belief. With it came enormous cultural change: Latin literacy and books, Roman notions of law and property, and the concept of town life, as well as new tastes in food, drink, and

dress. Whether from faith or by force, from self-interest or by revelation, conversion had an immense impact that is with us even today.

This captivating journey into the heart of a country is a timely and brilliant celebration of a valiant and richly cultured people.

The Oxford Handbook of Medieval Christianity Aug 04 2020 The Oxford Handbook of

Medieval Christianity takes as its subject the beliefs, practices, and institutions of the Christian Church between 400 and 1500AD. It addresses topics ranging from early medieval monasticism to late medieval mysticism, from the material wealth of the Church to the spiritual exercises through which certain believers might attempt to improve their souls. Each chapter tells a story, but seeks also to ask how and why 'Christianity' took particular forms at particular moments in history, paying attention to both the spiritual and otherworldly aspects of religion, and the material and political contexts in which they were often embedded. This Handbook is a landmark academic collection that presents cutting-edge interpretive perspectives on medieval religion for a wide academic audience, drawing together thirty key scholars in the field from the United States, the UK, and Europe. Notably, the Handbook is arranged thematically, and

focusses on an analytical, rather than narrative, approach, seeking to demonstrate the variety, change, and complexity of religion throughout this long period, and the numerous different ways in which modern scholarship can approach it. While providing a very wide-ranging view of the subject, it also offers an important agenda for further study in the field.

The Crusader World Mar 11 2021 The Crusader World is a multidisciplinary survey of the current state of research in the field of crusader studies, an area of study which has become increasingly popular in recent years. In this volume Adrian Boas draws together an impressive range of academics, including work from renowned scholars as well as a number of thought-provoking pieces from emerging researchers, in order to provide broad coverage of the major aspects of the period. This authoritative work will play an important role in the future direction of crusading studies. This volume enriches present knowledge of the crusades, addressing such wide-ranging subjects as: intelligence and espionage, gender issues, religious celebrations in crusader Jerusalem, political struggles in

crusader Antioch, the archaeological study of battle sites and fortifications, diseases suffered by the crusaders, crusading in northern Europe and Spain and the impact of Crusader art. The relationship between Crusaders and Muslims, two distinct and in many way opposing cultures, is also examined in depth, including a discussion of how the Franks perceived their enemies. Arranged into eight thematic sections, The Crusader World considers many central issues as well as a large number of less familiar topics of the crusades, crusader society, history and culture. With over 100 photographs, line drawings and maps, this impressive collection of essays is a key resource for students and scholars alike.

The Crusades Oct 18 2021 The Crusades of the Middle Ages were fought by Latin Christians against peoples who they believed were threatening the existence of their Christian faith. Some of these campaigns were against Muslims, some were against other Christians, and some were against pagans. Topically oriented chapters backed up by biographies, primary documents, maps, and illustrations make this an ideal introductory reference resource to this pivotal period

in European medieval history. The Crusades were distinctive because they were an invention of Latin Christians, they had their own symbols and traditions, and they were not one war but many, fought over several centuries. Thematic chapters provide an overview of the Crusades--why scholars believe they were fought, why they appealed to a very broad cross-section of Europe's population, and what motivated crusaders to dedicate years of their lives to the martial cause of Christendom. Among other interesting facts, readers will learn that to the Muslim states, the Christian Crusades were more of a distraction, as the Mongols from the East and schisms within occupied the bulk of their efforts, and that when it was convenient and advantageous--which was often--Christians and Muslims would ally with one another, or serve as mercenaries in each other's armies. Covering the classic crusades to the Holy Lands and the taking and defending of Jerusalem, Nicholson also gives equal

treatment to the just as important Reconquista of the Iberian peninsula, the subjugation and conversion of pagans in North-Western Europe, the Crusades against the Ottoman Turks in the Balkans, and the internal Crusades against the heretical Albigensians and Hussites. An annotated timeline provides readers with an easy-to-follow overview of the several centuries' worth of Crusading, and a half-dozen maps provide rapid and easy-to-read geographical and political information on the most important campaigns. Seventeen biographical sketches of key Christian, Muslim, Balkan, Spanish, and pagan figures and a dozen annotated primary documents breathe fresh life into the topic, providing students and readers with a new look at the period. A glossary is provided, as is an annotated bibliography and index.

A New History of Ireland, Volume II Feb 28 2020 This second volume of the A New History of Ireland series opens

with a character study of medieval Ireland and a panoramic view of the country c.1169, followed by nineteen chapters of narrative history. There are further chapters on Gaelic and colonial society, literature, architecture, sculpture, manuscripts and illuminations, and coinage. *The English and the Normans* Feb 19 2022 Since the Anglo-Norman period itself, the relations between the English and the Normans have formed a subject of lively debate. For most of that time, however, complacency about the inevitability of assimilation and of the Anglicization of Normans after 1066 has ruled. This book first challenges that complacency, then goes on to provide the fullest explanation yet for why the two peoples merged and the Normans became English. Drawing on anthropological theory, the latest scholarship on Anglo-Norman England, and sources ranging from charters and legal documents to saints' lives and romances, it provides a complex exploration of ethnic

relations on the levels of personal interaction, cultural assimilation, and the construction of identity. As a result, the work provides an important case study in pre-modern ethnic relations that combines both old and new approaches, and sheds new light on some of the most important developments in

English history.
