Methodological guide to reduce carbon and water footprints in banana plantations Jan 07 2021
The World Banana Forum (WBF) publication developed a methodological guide to reduce water

and carbon footprints in banana plantations worldwide. Members of the Working Group (WG) on Sustainable Production Systems and Environmental Impact acknowledged the contribution of banana production in the total global GHG emissions and the consumption of freshwater in the economic activity, both stressed in the 2015 Paris Climate Conference (COP21), having the agricultural sector a high mitigation potential. Therefore, the WG wishes to contribute to the global fight against climate change and promote the sustainable use of natural resources, developing practical tools to strengthen the efforts of the global banana industry to reduce its carbon and water footprint (CWF). Since banana farmers are struggling to adapt to climate change, the project aims to mainstream and support the adoption of best climate-smart practices and efficient water management in the banana value chain as part of the environmental strategy of organizations. Efforts to promote CWF reduction programs in the banana industry are still incipient and carried out mostly by multinationals, due in part to the implementation costs, the complexity of the topic for farmers, the lack of user-friendly tools to measure them efficiently, and that is still a B2B-driven strategy not yet recognized by consumers. Even though the need for supporting carbon and water footprint analysis (CWF) in the banana industry remains strong, there is still an apparent lack of sufficient financial incentives by both the governments and the global market.

Lady Windermere's Fan Oct 16 2021 This series presents students with a library of outstanding plays, many of which are otherwise unobtainable, or available only in out-of-date or unannotated editions. The texts are newly edited, with modernized spelling and punctuation where appropriate; and there are scholarly introductions and annotation. Oscar Wilde was already one of the best-known literary figures in Britain when he was persuaded to turn his extraordinary talents to the theatre. Between 1891 and 1895 he produced a sequence of distinctive plays which spearheaded the dramatic renaissance of the 1890s, and retain their power today. The social comedies, *Lady Windermere's Fan*, *A Woman of No Importance*, and *An Ideal Husband*, offer a moving as well as witty dissection of society and its morals, with a sharp focus on sexual politics. By contrast, the experimental, symbolist *Salome*, written originally in French, was banned for public performance by the English censor. Wilde's final dramatic triumph was his 'trivial' comedy for serious people, *The Importance of Being Earnest*, arguably the greatest farcical comedy in English.

Cuando los sistemas ferroviarios urbanos se planifican e implementan adecuadamente como parte de una red de transporte público más amplia, éstas pueden brindar vías rápidas de movilidad y acceso vital a los centros urbanos desde la periferias. Los servicios ferroviarios urbanos de alto rendimiento, cuando se abordan cuidadosamente en el contexto de un proyecto de desarrollo, pueden ayudar a mejorar la calidad de vida de los ciudadanos brindándoles acceso a oportunidades laborales y servicios esenciales, tanto del entorno urbano inmediato como de comunidades vecinas. Este manual sintetiza y difunde conocimientos sobre planificación, implementación y operación de los proyectos ferroviarios urbanos para: i) destacar la necesidad de realizar estudios tempranos y planificar los proyectos, ii) contribuir a que los proyectos sean más sostenibles (desde el punto de vista económico, social y ambiental); iii) mejorar los beneficios socioeconómicos de los usuarios y el acceso de estos a distintas oportunidades; iv) maximizar el valor de la participación privada, cuando corresponda, y v) fortalecer la capacidad de las instituciones encargadas de la gestión e implementación de los proyectos.
