Scholars have too frequently overlooked the ways in which their predominantly male subjects have themselves been shaped by gender. Seeing Nature through Gender here reintroduces gender as a meaningful category of analysis for environmental history, showing how women's actions, desires, and choices have shaped the world and seeing men as gendered actors as well. In thirteen essays that show how gendered ideas have shaped the ways in which people have represented, experienced, and consumed their world, Virginia Scharff and her coauthors explore interactions between gender and environment in history. Ranging from colonial borderlands to transnational boundaries, from mountaintop to marketplace, they focus on historical representations of humans and nature, on questions about consumption, on environmental politics, and on the complex reciprocal relations among human bodies and changing landscapes. They also challenge the "ecofeminist" position by challenging the notion that men and women are essentially different creatures with biologically different destinies. Each article shows how a person or group of people in history have understood nature in gendered terms and acted accordingly—often with dire consequences for other people and organisms. Here are considerations of the ways we study sexuality among birds, of William Byrd's masking sexual encounters in his account of an eighteenth-century expedition, of how the ecology of fire in a changing built environment has reshaped firefighters' own gendered identities. Some are playful, as in a piece on the evolution of "snow bunnies" to "shred betties." Others are dead serious, as in a chilling portrait of how endocrine disrupters are reinventing humans, animals, and water systems from the cellular level out. Aiding and adding significantly to the enterprise of environmental history, Seeing Nature through Gender bridges gender history and environmental history in unexpected ways to show us how the natural world can remake the gendered patterns we've engraved on ourselves and on the planet. In his bestselling Guide to Turning Back the Clock, Dr. Bob Arnot showed men everywhere how to look younger, feel younger, be younger Now, in his new book, he reveals the secrets of permanent weight loss for both men and women -- and gives us a breakthrough eating plan for the twenty-first century. Drawing on up-to-the-minute research in many disciplines, Arnot demonstrates that foods act like drugs on the body: some invariably promote weight gain and make us feel terrible; others almost guarantee weight loss and make us feel terrific. Armed with these findings, Arnot shows step-by-step how anyone can discover new energy, shed unwanted pounds, and never suffer from hunger pangs -- simply by eating the right foods in the right combinations. Complete with the most potent food charts ever assembled -- a complete arsenal of foods to promote weight control -- plus fat-loss accelerators, fat-ripping exercises, tips on dining in restaurants, and much more, Dr. Bob Arnot's Perfect Weight Control for Men and Women, is the ultimate guide for everyone who wants to feel great, lose weight, and look great. “Leonard’s durable tome (seriously, the cover is rubber) is stuffed with so many tips about surviving in the wild, you’ll be able to leave your smartphone behind.” —Entertainment Weekly, Best New Books This easy introduction to outdoor life will ensure that even a novice won’t get lost in the woods while finding an activity he loves to do in the great outdoors--whether it’s hiking a 14er or camping on ice.
