Radar Instruction Manual Apr 11 2021 Since 1958 the Maritime Administration has continuously conducted instruction in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal State Agencies.Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to promote most modern techniques in training methods, radar simulators were installed in Maritime Administration's three schools.It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a state-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook onboard reference handbook.This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Great Lakes, Coastwise and Inland Waters navigation.Robert J.
