Girl Online Jul 10 2021 What happens when a woman goes online? She becomes a girl. The unwritten contract of the internet, that a user is what is used, extends from the well-examined issue of data privacy and consent to the very selves women are encouraged to create in order to appear. Invited to self-construct as “girls online,” vloggers, bloggers and influencers sign a devil’s bargain: a platform on the condition they commodify themselves, eternally youthful, cute and responsibility-free, hiding offline domestic, professional and emotional labour while paying for their online presence with “accounts” of

personal “experience.” Told via the arresting personal narrative of one woman negotiating the (cyber)space between her identities as girl, mother, writer, and commodified online persona, *Girl Online* is written in a plethora of the online styles, from programming language to the blog/diary, from tweets to lyric prose, taking in selfies, social media, celebrity and Cyberfeminism.

Sizing People Up May 08 2021 A former FBI agent shares his simple but powerful toolkit for assessing who you can trust--and who you can't. After two decades as a behavior analyst in the FBI, Robin Dreeke knows a thing or two about sizing people up. He's navigated complex situations that range from handling Russian spies to navigating the internal politics at the Bureau. Through that experience, he was forced to develop a knack for reading people--their intentions, their capabilities, their desires and their fears. Dreeke's first book, *It's Not All About "Me,"* has become a cult favorite with readers seeking to build quick rapport with others. His last book, *The Code of Trust*, was about how to inspire trust in others as a leader. In *Sizing People Up*, Dreeke shares his simple, six-step system that helps you predict anyone's future behavior based on their words, goals, patterns of action, and the situation at hand. Predicting the behavior of others is an urgent need for anyone whose work involves relationships with others, whether it's leading an organization, collaborating with a teammate, or closing a sale. But predictability is not as simple as good and evil, or truth and fiction. Allies might make a promise with every intention of keeping it, not realizing that they will be unable to do so due to some personal shortcoming. And those seeking to thwart your endeavor may not realize how reliable their malevolent tells have become.

Dreeke's system is simple, but powerful. For instance, a colleague might have a strong moral code, but do they believe your relationship will be long-term? Even the most upstanding person can betray your trust if they don't see themselves tied to you or your desired result in the long term. How can you determine whether someone has both the skill and will to do what they've said they're going to do? Behaviors as subtle as how they take notes will reveal their reliability. Using this book as their manual, readers will be able to quickly and easily determine who they can trust and who they can't; who is likely to deliver on promises and who will disappoint; and when a person is vested in your success vs when they are actively plotting your demise. With this knowledge they can confidently embark on anything from a business venture to a romantic relationship to a covert operation without the stress of the unknown.

The News: A User's Manual Mar 18 2022 The news is everywhere. We can't stop constantly checking it on our computer screens, but what is this doing to our minds? We are never really taught how to make sense of the torrent of news we face every day, writes Alain de Botton (author of the best-selling *The Architecture of Happiness*), but this has a huge impact on our sense of what matters and of how we should lead our lives. In his dazzling new book, de Botton takes twenty-five archetypal news stories—including an airplane crash, a murder, a celebrity interview and a political scandal—and

submits them to unusually intense analysis with a view to helping us navigate our news-soaked age. He raises such questions as Why are disaster stories often so uplifting? What makes the love lives of celebrities so interesting? Why do we enjoy watching politicians being brought down? Why are upheavals in far-off lands often so boring? In *The News: A User's Manual*, de Botton has written the ultimate guide for our frenzied era, certain to bring calm, understanding and a measure of sanity to our daily (perhaps even hourly) interactions with the news machine. (With black-and-white illustrations throughout.)

PASCAL User Manual and Report Nov 13 2021 A preliminary version of the programming language Pascal was drafted in 1968. It followed in its spirit the Algol-6m and Algol-W line of languages. After an extensive development phase, a first compiler became operational in 1970, and publication followed a year later (see References 1 and 8, p.104). The growing interest in the

development of compilers for other computers called  
for a consolidation of Pascal, and two years of  
experience in the use of the language dictated a few  
revisions. This led in 1973 to the publication of a  
Revised Report and a definition of a language  
representation in terms of the ISO character set. This  
booklet consists of two parts: The User Manual, and the  
Revised Report. The Manual is directed to those who  
have previously acquired some familiarity with  
computer programming, and who wish to get acquainted  
with the language Pascal. Hence, the style of the Manual  
is that of a tutorial, and many examples are included to  
demonstrate the various features of Pascal. Summarising  
tables and syntax specifications are added as  
Appendices. The Report is included in this booklet to  
serve as a concise, ultimate reference for both  
programmers and implementors. It defines standard  
Pascal which constitutes a common base between various  
implementations of the language.

Rules of Thum Mar 06 2021 Much has been written about the "imminent" return of Jesus Christ. But what will our world be like if He tarries for 10, 100, or 1000 more years? This story is a view of the post-apocalyptic world of our distant future, as present-day political and social currents are extrapolated to their logical conclusions. It looks at the events of today, and predicts that they are "the shadows of the things that will be", as Ebenezer Scrooge inquired of the "spirit". Charles Dickens, in "A Christmas Carol", said it best: "Men's courses will foreshadow certain ends, to which, if persevered in, they must lead.

But if the courses be departed from, the ends will change." THE HISTORY OF OUR FUTURE is a plea for western civilization to depart from its present "courses". One of the "characters" in this post-apocalyptic vision is an historic old house that presently exists in our country. It has witnessed much during its existence, and will participate in great events which will change the world of the people of this far-away time as they learn the wisdom of their ancients, that "Resistance to Tyranny is Obedience to God".
