Human Language Technology. Challenges of the Information Society Feb 02 2021 Half a century ago not many people had realized that a new epoch in the history of homo sapiens had just started. The term "Information Society Age" seems an appropriate name for this epoch. Communication was without a doubt a lever of the conquest of the human race over the rest of the animate world. There is little doubt that the human race began when our predecessors started to communicate with each

other using language. This highly abstract means of communication was probably one of the major factors contributing to the evolutionary success of the human race within the animal world. Physically weak and imperfect, humans started to dominate the rest of the world through the creation of communication-based societies where individuals communicated initially to satisfy immediate needs, and then to create, accumulate and process knowledge for future use. The crucial step in the history of humanity was the invention of writing. It is worth noting that writing is a human invention, not a phenomenon resulting from natural evolution. Humans invented writing as a technique for recording speech as well as for storing and facilitating the dissemination of knowledge across the world. Humans continue to be born illiterate, and therefore teaching and conscious supervised learning is necessary to maintain this basic social skill.

Today's Technician: Automotive Engine Repair & Rebuilding, Classroom Manual and Shop Manual, Spiral bound Version Oct 22 2022 TODAY'S

TECHNICIAN: AUTOMOTIVE ENGINE REPAIR &

REBUILDING, 5th Edition delivers the theoretical and practical knowledge you need to repair and service modern automotive engines and prepare for the Automotive Service Excellence (ASE) certification exam. Designed around National Automotive Technicians Education Foundation (NATEF) standards, this system-specific text addresses engine construction, engine operation, intake and exhaust systems, and engine repair, as well as the basics in engine rebuilding. Move your career forward with discussions about advancements in hybrid technology, factors affecting engine performance, and the designs and functions of modern component parts. Long known for its technical accuracy and concise writing style, TODAY'S TECHNICIAN: AUTOMOTIVE ENGINE REPAIR & REBUILDING, 5th Edition revs up your reading experience with realistic line drawings, detailed photos, critical thinking questions, and much more! Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Smart Device Recognition Jul 27 2020 The book is the first international reference on the field of smart device recognition and Ubiquitous Electric Internet of Things (UEIOT). It presents a range of

state-of-the-art key methods and applications for smart device recognition. In future smart environments, obtaining energy consumption information for identifying every device is an effective approach to guarantee the energy efficiency of smart industrial systems. Such as, the Ubiquitous Electric Internet of Things (UEIOT) technology represents one of the most effective measures for electricity and energy management and has attracted considerable attention from scientists and engineers around the world. The realization of smart device recognition in the UEIOT framework has become the core and basis of UEIOT's success. The device smart recognition can help governments and managers to distribute energy and power better, and help device manufacturers to improve their products regarding smart energy conservation. Accordingly, in the future smart industry, implementing smart device recognition is desired and very important. In the book, several methods, strategies, and experiments for achieving smart device recognition are presented in details. As the first monograph in the field of smart device recognition, the book can provide beneficial reference for students, engineers, scientists, and managers in the fields of power, energy, electromechanical devices, smart cities, artificial intelligence, etc.

Manual of Oculoplastic Surgery Oct 10 2021 This manual is a concise guide for performing oculoplastic surgical procedures, emphasizing the procedures found to be most effective for each clinical situation and anatomic region. The step-by-step approach to each procedure is complemented by easy-to-follow drawings and enables the surgeon to complete the surgical procedure successfully and with good results.

Ceramic Materials And Components For Engines - Proceedings Of The 5th International Symposium Nov 30 2020 The 5th of a prestigious series of conferences, these proceedings are devoted to the latest achievements in ceramic materials and components for engines. Their purpose is to advance structural ceramics and ceramic engine technology on a worldwide scale and provide a state-of-the-art survey of this increasingly important field. The papers presented cover many aspects from basic research and development to production, properties and applications. These proceedings will be of interest to ceramists and mechanical engineers concerned with the potential use of ceramic components in engines.

The Washington Manual of Medical Therapeutics Aug 20 2022 For the past 65 years, The Washington

Manual® of Medical Therapeutics, now in its Thirty-Fourth Edition, has been one of the best-selling medical texts in the world. It builds upon that proud tradition--with even more of the current information you need, and delivered in a time-saving, quick-reference style. Its comprehensiveness and ease of access makes it a favorite on-call resource for housestaff and faculty around the world. Continuing the tradition of excellence, each chapter has been updated and reformatted for easier access to the information the reader needs. Inside this edition you'll find... • New streamlined format that helps you keep pace with the latest advances in the field while removing redundancies and outdated information • New chapter on toxicology prepares you to respond effectively to any poisoning, overdose, or exposure emergency • Decision support algorithms for quick reference See why The Washington Manual® is the most vital on-call resource for house staff and faculty around the world!

Verbal Notes and Sketches for Marine Engineer Officers; a Manual of Marine Engineering Practice
May 05 2021 This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1920 edition. Excerpt: ... screw up

as lightly as is necessary to secure tig/ztm'ss, but not.rtz_'fl'm's.r. It is advisable to occasionally examine the leathers in the telemotor and motor cylinder aft when the ship is in port. The necessity for this can be ascertained by pulling the steering wheel hard over to port and securing it there. The motor cylinder will be found to have responded to same extent. If the gear is now left, say for half an hour, the spring in the motor cylinder will have moved the piston towards midship position if there is any leakage in the port leather. A similar trial may be made to starboard, which will test these leathers. It need not be expected that these leathers should be quite tight, but the motor piston should remain over for say ten minutes without any serious movement towards midship position, that being about the maximum time that, in practice, a helm would be held hard over; and so any little deviation due to leaky leathers would be at once adjusted when the steering wheel is let go, the motor springs running it back to zero, and the bye-pass allowing the free circulation of the fluid. Fig. 5 is a section of the telemotor through the centre of the shaft, and shows a screwed plug X. When it is desired to take out the shaft E (the indicator being at zero), this plug is withdrawn and the other end screwed into the cylinder until its point enters a recess in the rack C. The rack is thus kept in its central position until the shaft and the pinion are replaced. Care

should be taken to lubricate with good oil the various working parts of the gear. _ A glycerometer and thermometer are supplied with each installation, so that it is possible to test the actual proportion of glycerme in the fluid at any time when the gear is not in...

IBM Content Manager OnDemand Guide Feb 20 2020 This IBM® Redbooks® publication provides a practical guide to the design, installation, configuration, and maintenance of IBM Content Manager OnDemand Version 9.5. Content Manager OnDemand manages the high-volume storage and retrieval of electronic statements and provides efficient enterprise report management. Content Manager OnDemand transforms formatted computer output and printed reports, such as statements and invoices, into electronic information for easy report management. Content Manager OnDemand helps eliminate costly, high-volume print output by capturing, indexing, archiving, and presenting electronic information for improved customer service. This publication covers the key areas of Content Manager OnDemand, some of which might not be known to the Content Manager OnDemand community or are misunderstood. The book covers various topics, including basic information in administration, database structure, storage management, and security. In addition, the book covers data indexing, loading, conversion, and expiration. Other topics include user exits, performance, retention management, records management, and many more. Because many other resources are available that address subjects on different platforms, this publication is not intended

as a comprehensive guide for Content Manager OnDemand. Rather, it is intended to complement the existing Content Manager OnDemand documentation and provide insight into the issues that might be encountered in the setup and use of Content Manager OnDemand. This book is intended for individuals who need to design, install, configure, and maintain Content Manager OnDemand.

Biliary Tract Surgery Jan 21 2020 This book presents the latest application of digital medical imaging technology in biliary tract surgery, including three-dimensional visualization preoperative evaluation, preoperative surgical planning, and simulated biliary surgery. Digital surgical diagnosis and treatment of cholecystolithiasis, bile duct stones, hepatolithiasis, gallbladder cancer, and bile duct cancer is described in details with more than 900 illustrations. Written by experts with wealthy of clinical experience, it will be a useful reference for general surgeons, as well as practitioners in related

disciplines.

This is a textbook for upper undergraduate and graduate courses on microwave engineering, written in a student-friendly manner with many diagrams and illustrations. It works towards developing a foundation for further study and research in the field. The book begins with a brief history of microwaves and introduction to core concepts of EM waves and wave guides. It covers equipment and concepts involved in the study and measurement of microwaves. The book also discusses microwave propagation in space, microwave antennae, and all aspects of RADAR. The book provides core pedagogy with chapter objectives, summaries, solved examples, and end-of-chapter exercises. The book also includes a bonus chapter which serves as a lab manual with 15 simple experiments detailed with proper circuits, precautions, sample readings, and quiz/viva questions for each experiment. This book will be useful to instructors and students alike.

Dogen's Manuals of Zen Meditation Feb 14 2022

Zen Buddhism is perhaps best known for its emphasis on meditation, and probably no figure in the history of Zen is more closely associated with

meditation practice than the thirteenth-century Japanese master Dogen, founder of the Soto school. This study examines the historical and religious character of the practice as it is described in Dogen's own meditation texts, introducing new materials and original perspectives on one of the most influential spiritual traditions of East Asian civilization. The Soto version of Zen meditation is known as "just sitting," a practice in which, through the cultivation of the subtle state of "nonthinking," the meditator is said to be brought into perfect accord with the higher consciousness of the "Buddha mind" inherent in all beings. This study examines the historical and religious character of the practice as it is described in Dogen's own meditation texts, introducing new materials and original perspectives on one of the most influential spiritual traditions of East Asian civilization.
