Abstract: The successful college food service director has enthusiasm, empathy, dedication, ethics, quality consciousness, an outgoing personality, leadership ability, food service knowledge, business knowledge, close association with other food service professionals, and awareness of and dedication to good nutrition. A new food service director chronologically prioritizes steps to take to reorganize his operation. The manual presents reorganization steps chronologically to include: 1) developing a master plan; 2) setting up a food purchasing system; 3) establishing budgets and control; 4) building a staff; 5) maintaining food quality; and 6) dealing with residence halls, cash operations, vending, sanitation, safety, catering, special events, and public relations. Appendixes and exhibits provide illustrative, helpful suggestions. A food service director's job can be creative, imaginative, challenging, interesting, and rewarding for the director who is on top of things. This Fertilizer Manual was prepared by the International Fertilizer Development Center (IFDC) as a joint project with the United Nations Industrial Development Organization (UNIDO). It is designed to replace the UN Fertilizer Manual published in 1967 and intended to be a reference source on fertilizer production technology and economics and fertilizer industry planning for developing countries. The aim of the new manual is to describe in clear, simple language all major fertilizer processes, their requirements, advantages and disadvantages and to show illustrative examples of economic evaluations. The manual is organized in five parts. Part I deals with the history of fertilizers, world outlook, the role of fertilizers in agriculture, and raw materials and includes a glossary of fertilizer-related terms. Part II covers the production and transportation of ammonia and all important nitrogen fertilizers-liquids and solids. Part III deals with the characteristics of phosphate rock, production of sulfuric and phosphoric acid, and all important phosphate fertilizers, including nitrophosphates and ammonium phosphates. Part IV deals with potash fertilizers-ore mining and refining and chemical manufacture; compound fertilizers; secondary and micronutrients; controlled-release fertilizers; and physical properties of fertilizers. Part V includes chapters on planning a fertilizer industry, pollution control, the economics of production of major fertilizer products and intermediates, and problems facing the world fertilizer industry. This book provides detailed illustrated reports on important recent advances

in processing of foods including separation, mixing, preservation, and extrusion. The authors are specialists in food processing from North America and Europe. The reports were originally presented at the Conference of Food Engineering sponsored by the American Institute of Chemical Engineers in 1992 and 1993; they were selected, rewritten and updated for this book.
