This practical and holistic approach to offering library resources and services to online patrons addresses multiple areas of service to online patrons, including reference, instruction, access, and marketing. Academic libraries are wonderful resources for university students and faculty on campus, and public libraries thrive on providing targeted in-person services such as storytime, makerspaces, and adult programming. It can be easy, however, to forget about the large

population of students, faculty, and community members who access library resources and use library services remotely. Library Services for Online Patrons reaches out to patrons who are not—or not always—located on campus or who seldom—if ever—visit libraries' physical facilities and who may not be aware of or able to equitably use library services. The authors focus on ways to organize library resources using principles of design and to cater library services to the specific needs of online students, faculty, and community members. They also address how to effectively target marketing to the online population and how to collaborate with campus and community stakeholders who work directly with them. Provides novel services and resources that will save librarians already serving online patrons time and energy Offers a broad, practical perspective to help novice librarians make initial connections with online learners Emphasizes the importance of identifying other institutional players in online education in order to effectively implement and market improvements Enhances understanding of the importance of universal design and how to assess possibilities for improvement in online services The popular Saunders Guide to

The work of the Council of Europe for democracy is strongly based on education: education in schools, and education as a lifelong learning process of practising democracy, such as in non-formal learning activities. Human rights education and education for democratic citizenship form an integral part of what we have to secure to make democracy sustainable. Hate speech is one of the most worrying forms of racism and discrimination prevailing across Europe and amplified by the Internet and social media. Hate speech online is the visible tip of the iceberg of intolerance and ethnocentrism. Young people are directly concerned as agents and victims of online abuse of human rights; Europe needs young people to care and look after human rights, the life insurance for democracy. Bookmarks is published to support the No Hate Speech Movement youth campaign of the Council of Europe for human rights online. Bookmarks is useful for educators wanting to address hate speech online from a human rights perspective, both

inside and outside the formal education system. The manual is designed for working with learners aged 13 to 18 but the activities can be adapted to other age ranges. The Bankruptcy Abuse Prevention and Consumer Protection Act of 2005 provided new requirements for bankruptcy filers and gave the U.S. Trustee Program (USTP) new responsibility. Individual filers must now receive credit counseling during the 180 days before filing. USTP is charged with approving and reapproving counseling providers. This report examines steps USTP can take to develop measures of effectiveness of prebankruptcy credit counseling. Pollen grains are everywhere - in the air, in the water, in soil and in the food we eat. Pollen has direct relevance in agriculture, horticulture, plant breeding, crop improvement and biotechnology. They are further of use for monitoring cytotoxic effects - by herbicides, pesticides and pollutants - testing for allergic reactions, and for basic studies on gene expression, research on differentiation and polarity. Detailed instructions of the standard techniques, which have all been tested and improvised by the authors, are given, such as collection and storage of pollen, pollen culture, germination, tests for viability,

incompatibility and isolation of protoplasts. Introduced by an explanation of the principles involved, the step-by step protocols are complemented by personal notes and precautions, specifying the reagents used and various appendices on basic and specific requirements for laboratory exercises on pollen. This book focuses on searching and hands-on experience, which makes the text suitable for those who wish to learn searching for their own use as well. It is intended for those who will act as search intermediaries, accepting questions from clients and performing the searches. A step-by-step guide to creating good system documentation, well-illustrated with figures and examples. Demonstrates ways to create and install a documentation system, integrate the documentation system with the software development process, create a technical database, and create a manual from that database. Shows how to migrate from an add-on to in-line approach, and also how to bring existing systems up to standard. Excellent for software developers as well as electronic processing (EDP) shops, it shows how to prepare system documentation without major expenditures. Includes a wealth of time-saving tips and tricks, with advice on how to avoid

common pitfalls. *The Manual of Strategic Planning for Cultural Organizations* adopts a holistic approach to the creative world of cultural institutions. By encompassing museums, art galleries, gardens, zoos, science centers, historic sites, cultural centers, festivals, and performing arts, this book responds to the reality that boundaries are being blurred among institutional types—with many gardens incorporating exhibitions, many museums part of multidisciplinary cultural centers and festivals.. As cultural leaders transform the arts in the twenty-first century, this “whole career” manual will prepare readers for every stage. Three key areas covered are: Leadership change. This chapter explains the role of strategic planning when an institution is going through the process of hiring a new director. A question we are frequently asked is “Should the strategic plan precede the search process or should it wait until the new director takes up the position?” Institutional change. Increasingly, cultural organizations are going through major change: from public-sector agencies to nonprofit corporations; from private ownership to non-profit status; from nonprofit status to a foundation, and many other variations. This book addresses the role of

strategic planning during these transitions. Staff empowerment. This manual addresses the opportunities for staff at all levels to grow by participating in strategic planning. This edition focuses on how to engage and empower staff. A Guide for Museums, Performing Arts, Science Centers, Public Gardens, Heritage Sites, Libraries, Archives, and Zoos is a game-changing book with broad reach into the cultural sector, while still serving the museum community. Comprehensively updated, this three-volume edition of the Manual of Online Search Strategies covers the whole range of Internet, CD-ROM and dial-up online services, and includes several new chapters. International experts on each subject area, selected from the UK and North America, describe in detail how to identify and exploit specialist bibliographic and non-bibliographic databases, the best search methods and delivery modes, and the relative merits of different services and online hosts in their different disciplines. Numerous examples of search results are used to illustrate different strategies and commands. Each volume includes the editors' introductory chapter on search strategies, which gives an overview of searching language, platforms and vendors,

interfaces and search and database evaluation methods. Volume III incorporates a new chapter on education in addition to the updated chapters from the last edition. The Manual can be used as a subject handbook, a directory of recommended resources and as a textbook. This new edition provides extensive guidance for searchers of electronic information and is particularly useful for those working in a subject area other than their own. Readers will gain a professional 'edge' from the skill and wisdom that the specialist authors have passed on in their chapters and will be able to expand their searching techniques into new areas. A critically annotated bibliographic guide to print and electronic sources in print and broadcast journalism. This edition separates Commercial Databases and Internet Resources. In recent years scholars and practitioners have increasingly recognized that human resource management (HRM) has paid insufficient attention to the impact of context. While research has been devoted to examining the impact of national context on HRM systems, this literature has been largely separate from that focused on other levels of context affecting organizational choices in HRM strategies, such as the impact of the

organizational environment, industry sector, occupation or workforce characteristics. In addition, research has tended to consider elements of context in isolation rather than considering its impact at different levels. The goal of The Oxford Handbook of Contextual Approaches to Human Resource Management is to provide a more holistic approach to developing a contextual understanding of HRM. This Handbook offers a comprehensive understanding of the influence of contextual characteristics on the design and implementation of HRM systems. Rather than focusing on a single level or approach to examining context, the Handbook provides both conceptual and empirical analyses of different elements of context using a range of different lenses and measures. In order to explore the influence of contextual factors at multiple levels, the volume assembles a range of detailed accounts of how context affects the design, implementation and impact of HRM activities.
